

AMERICA'S EMERGING URANIUM PRODUCER

Corporate Presentation – March 2020

Disclaimer

Statements contained in this presentation which are not historical facts are forward-looking statements that involve risks, uncertainties and other factors that could cause actual results to differ materially from those expressed or implied by such forward-looking statements. Factors that could cause such differences, without limiting the generality of the following, include: risks inherent in exploration activities; volatility and sensitivity to market prices for uranium; volatility and sensitivity to capital market fluctuations; the impact of exploration competition; the ability to raise funds through private or public equity financings; imprecision in resource and reserve estimates; environmental and safety risks including increased regulatory burdens; unexpected geological or hydrological conditions; a possible deterioration in political support for nuclear energy; changes in government regulations and policies, including trade laws and policies; demand for nuclear power; failure to obtain necessary permits and approvals from government authorities; weather and other natural phenomena; and other exploration, development, operating, financial market and regulatory risks. Although Uranium Energy Corp believes that the assumptions inherent in the forward-looking statements are reasonable, undue reliance should not be placed on these statements, which only apply as of the date of this release. Uranium Energy Corp. disclaims any intention or obligation to update or revise any forward-looking statement, whether as a result of new information, future event or otherwise.'

Notice to U.S. Investors: The mineral resources referred to herein have been estimated in accordance with the definition standards on mineral resources of the Canadian Institute of Mining, Metallurgy and Petroleum referred to in NI 43-101 and are not compliant with U.S. Securities and Exchange Commission (the "SEC") Industry Guide 7 guidelines. In addition,

measured mineral resources, indicated mineral resources and inferred mineral resources, while recognized and required by Canadian regulations, are not defined terms under SEC Industry Guide 7 and are normally not permitted to be used in reports and registration statements filed with the SEC. Accordingly, we have not reported them in the United States. Investors are cautioned not to assume that any part or all of the mineral resources in these categories will ever be converted into mineral reserves. These terms have a great amount of uncertainty as to their existence, and great uncertainty as to their economic and legal feasibility. In particular, it should be noted that mineral resources which are not mineral reserves do not have demonstrated economic viability. It cannot be assumed that all or any part of measured mineral resources, indicated mineral resources or inferred mineral resources will ever be upgraded to a higher category. In accordance with Canadian rules, estimates of inferred mineral resources cannot form the basis of feasibility or other economic studies. Investors are cautioned not to assume that any part of the reported measured mineral resources, indicated mineral resources or inferred mineral resources referred to herein are economically or legally mineable.

Exploration Target Disclosure: In the Company's subject technical report all tonnages, grade, and contained pounds of uranium should not be construed to reflect a calculated mineral resource (inferred, indicated, or measured). The potential quantities and grades, as stated in the technical report, are conceptual in nature and there has been insufficient work to date to define a NI 43-101 compliant resource. Furthermore, it is uncertain if additional exploration will result in the discovery of an economic mineral resource on the project.

THREE PRONG STRATEGY

100% Un-Hedged Book for Maximum Upside

Align with contrarian long-term
capital

Grow Permitted Capacity and Production Readiness

Develop low-cost and scalable ISR
operations

Downturn Presented Acquisition Opportunities

Best time to acquire future
exploration & development pipeline

Diversified Asset Portfolio

Low-Cost ISR & Production Ready

58Mlbs Measured & Indicated
45Mlbs Inferred U₃O₈

Infrastructure - Texas

Hobson Processing Plant - Production Capacity of 2Mlbs/year

Texas Hub & Spoke ISR Portfolio

Project Name	Stage	Resources (Mlbs)	
		M&I	Inferred
Palangana (Fully Permitted)	(NT)	1.1	1.2
Goliad (Fully Permitted)	(NT)	5.5	1.5
Burke Hollow (Fully Permitted)	(NT)	-	7.1
Salvo	(E)	-	2.8

Reno Creek ISR Project (Fully Permitted)

Project Name	Stage	Resources (Mlbs)	
		M&I	Inferred
Reno Creek	(NT)	26	1.49

Licensed for 2Mlbs/year production

- Uranium
- Titanium
- Vanadium

Our Team

Amir Adnani

President, CEO, Director

An entrepreneur, founding CEO of UEC, founder and Chairman of GoldMining Inc., with extensive experience building natural resource companies.

Spencer Abraham

Chairman, Board of Directors

Served as a U.S. Senator from 1995 to 2001, as Secretary of Energy from 2001 to 2005 and previously as non-executive Chairman of Areva's U.S. board.

Scott Melbye

Executive Vice President

35 years of experience in senior roles with uranium majors, Cameco, Uranium One, and Kazatomprom. Former President of Uranium Producers of America and Chair of the World Nuclear Fuel Market.

Robert Underdown

VP of Production

Has held senior operational positions at ISR uranium mines in Texas for over 35 years.

Clyde Yancey

VP of Exploration

Over 35 years of experience in uranium exploration in North and South America.

Andy Kurrus

VP of Resource Development

Over 30 years experience with uranium exploration in the United States.

Hub & Spoke Production Strategy

Hobson is fully licensed and permitted.

The Processing Plant has a 2Mlbs / year physical capacity

UEC

Palangana ISR Mine

First Producing Mine

Proof of Concept

**\$10M
Initial CAPEX**

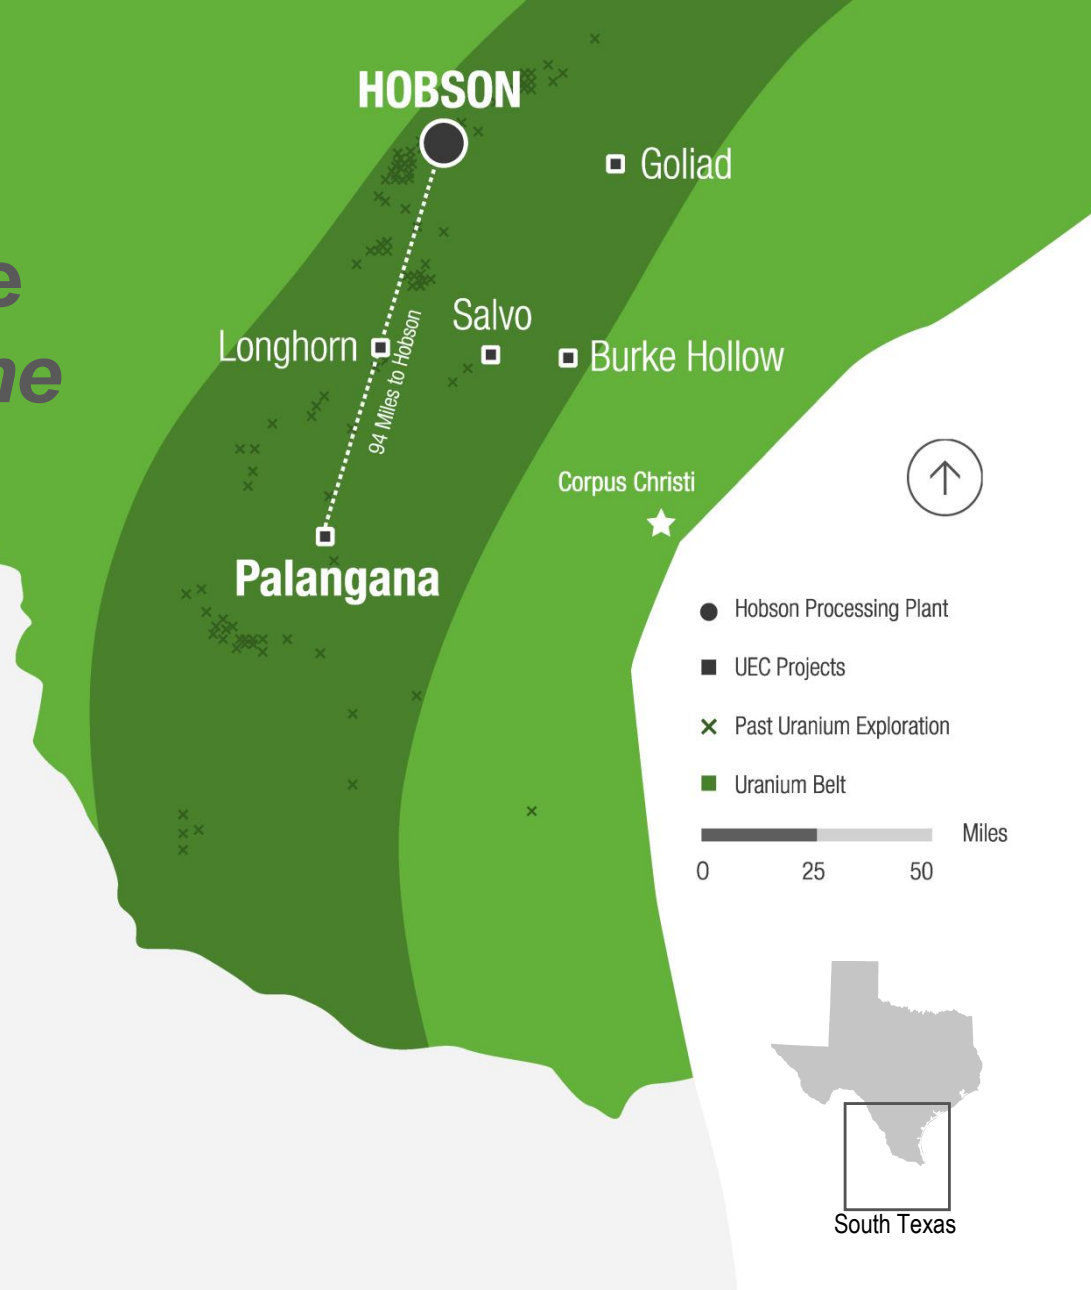

6 months construction
timeline

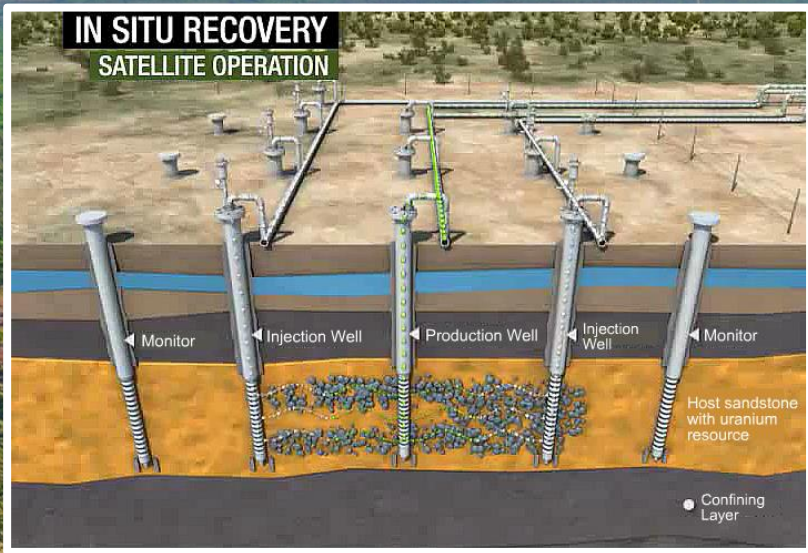

**Production
Ready**

- Low cash-cost of \$21.77/lb during operation
- Fully permitted including expanded mine permit
- Received 10-year renewal permits in 2019

**Similar Costs
for Future
Projects**

- The major permits for production have been issued for Goliad and Burke Hollow

Palangana Production Area 1 (PA-1)

In-Situ Recovery (ISR) Technology
Low Cost & Environmentally Friendly

Palangana Ion Exchange Facility

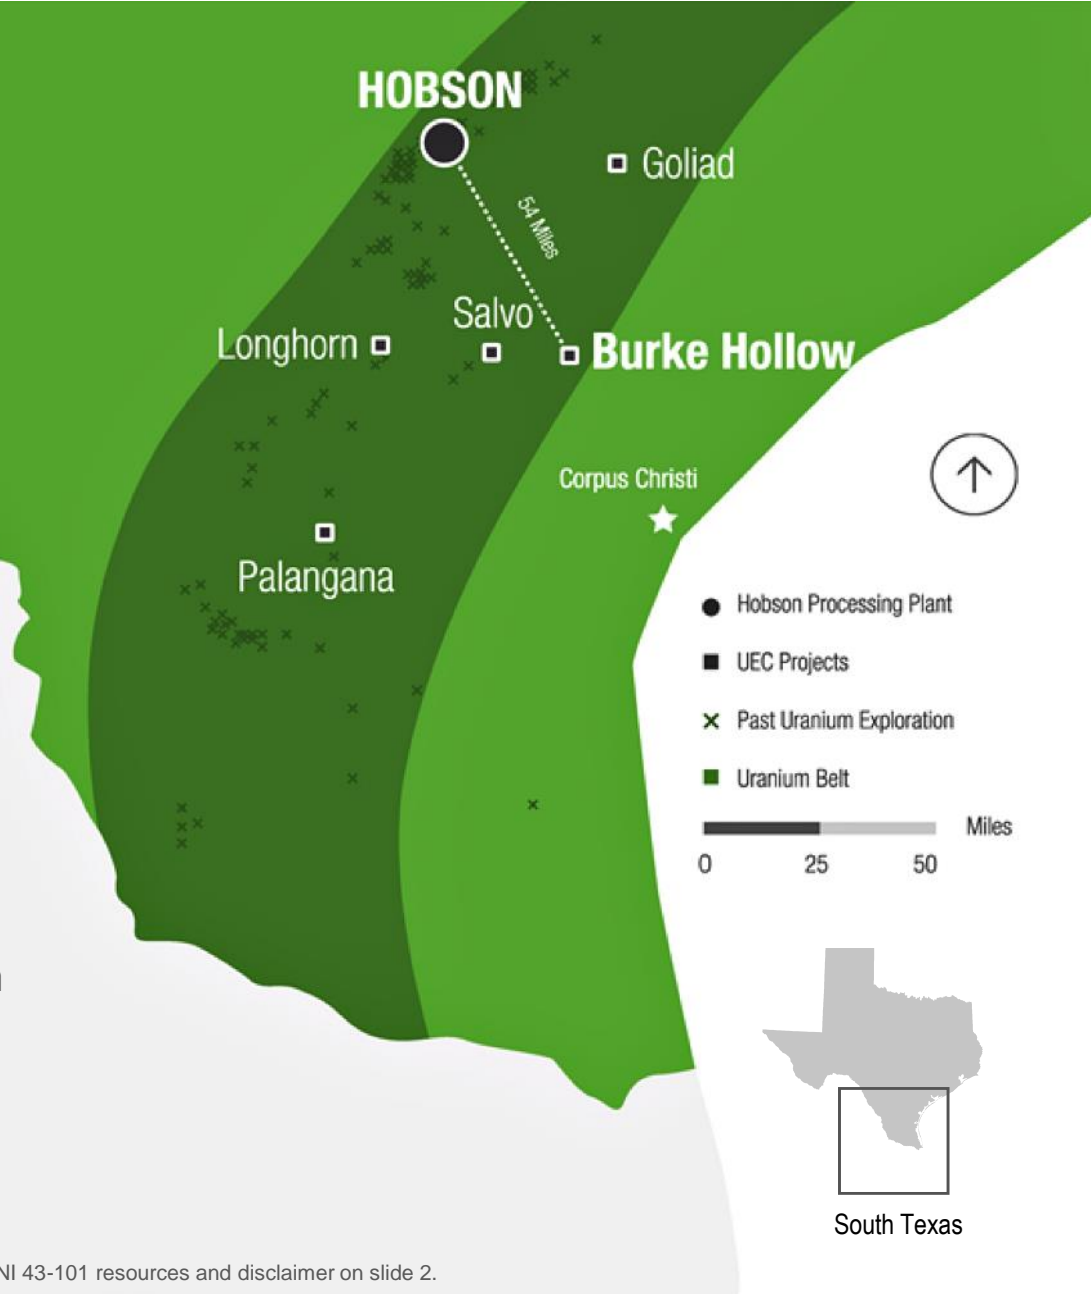

Resin Hauling Truck And Trailer

Burke Hollow ISR Project Growth Ahead

- Discovery of six trends since 2012
- 7.09Mlbs in 4.06Mt grading 0.088% U3O8
- Leach amenability testing indicates recovery greater than 90%
- ~20,000 acres located ~50 miles from Hobson Processing Plant.
- 50% of the property unexplored

*See news release dated Nov 5, 2019 and refer to a detailed breakdown of NI 43-101 resources and disclaimer on slide 2.

Burke Hollow

Advancing Towards Uranium Extraction

The following final permits have been issued:

- ✓ Mine Production Area
- ✓ Two Class I disposal wells
- ✓ Aquifer Exemption
- ✓ Radioactive Materials License*

2019 Drilling Discovers Additional Mineralization in Production Area 1

- ✓ 72 monitor wells installed
- ✓ Enlarged the Production Area 1 (PA-1) zone

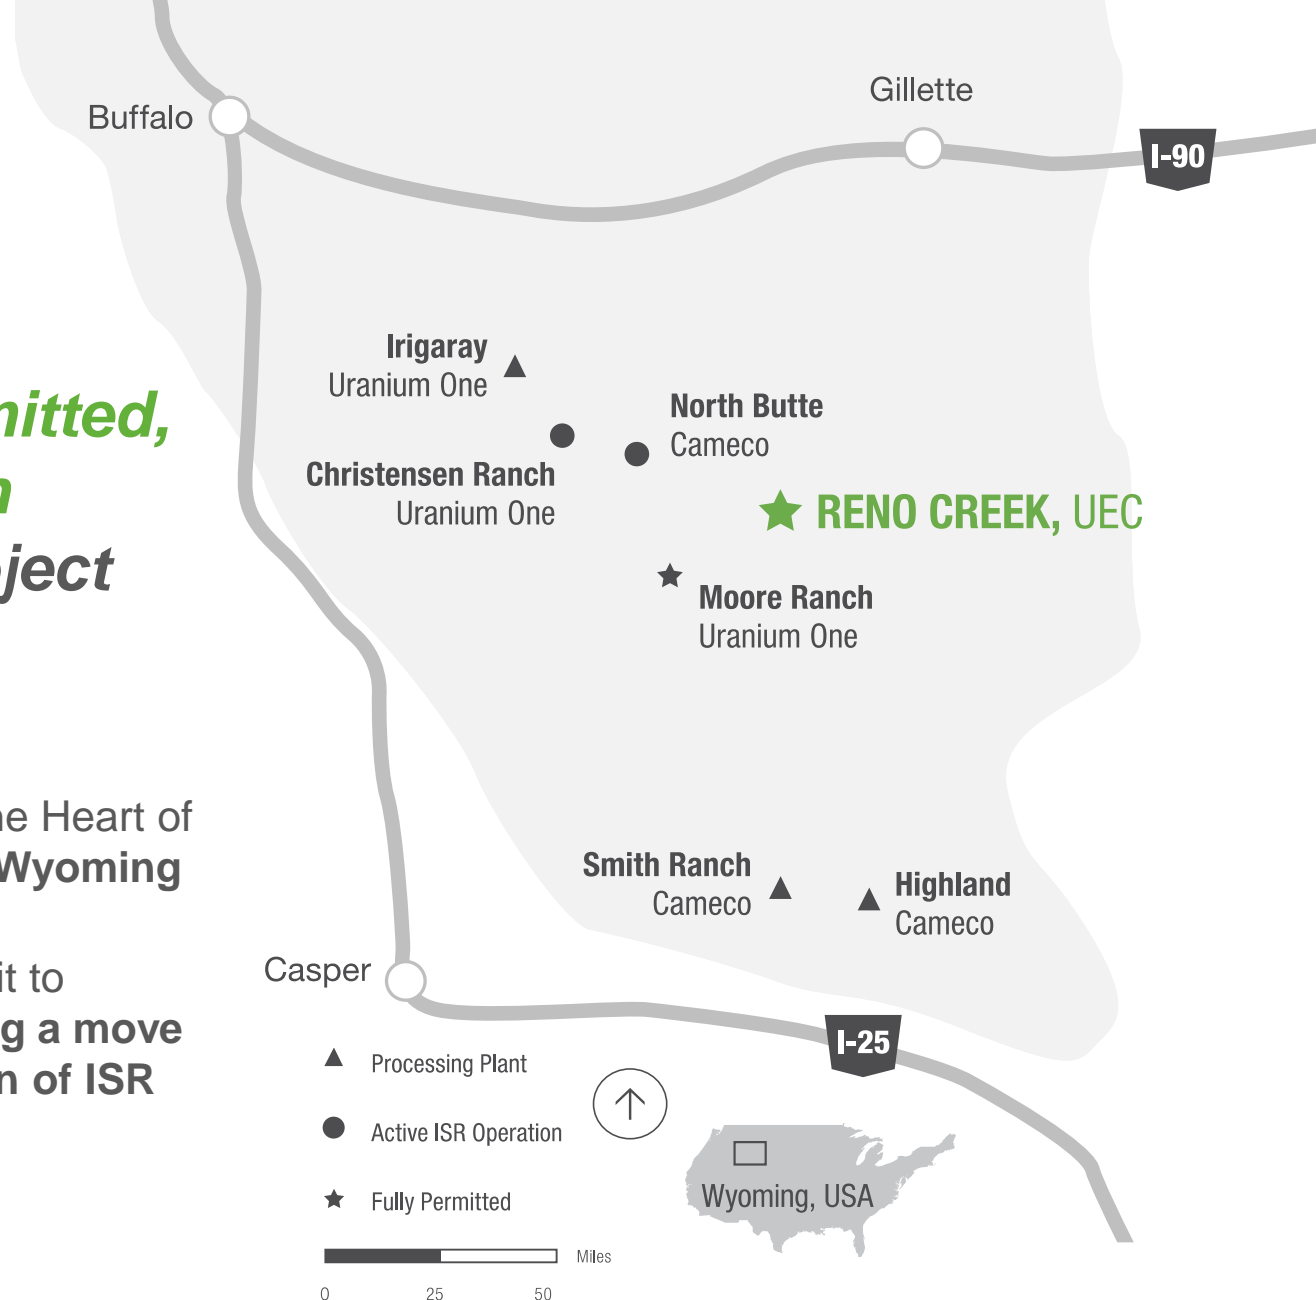

Next Step: Complete the expanded PA-1 delineation drilling and monitor well installation in 2020.

Reno Creek ISR Project

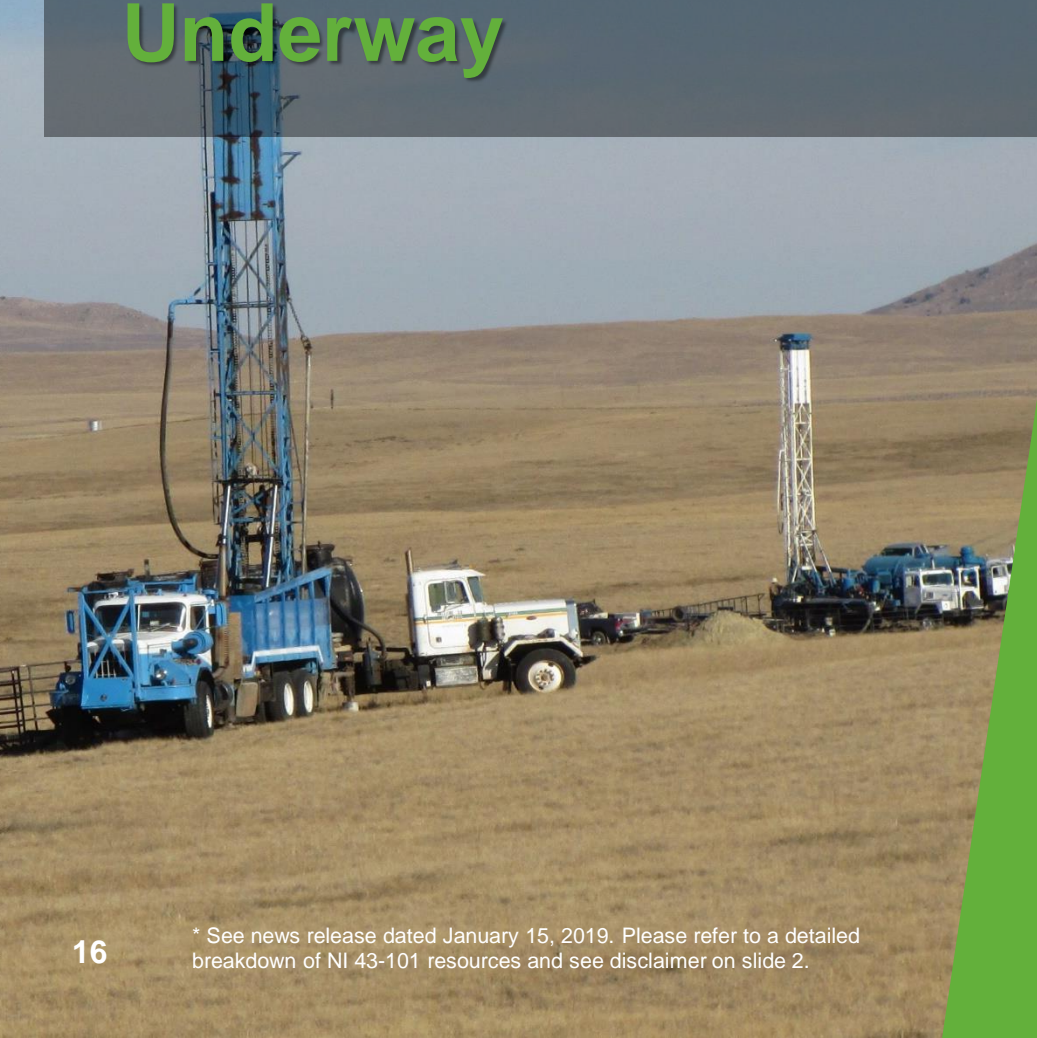

*The largest permitted,
pre-construction
ISR uranium project
in the U.S.*

Strategic Location within the Heart of
the **Powder River Basin, Wyoming**

Received a modified Permit to
Construct in 2019, **allowing a move
forward with construction of ISR
wellfields**

Reno Creek ISR Project Pre-Feasibility Study Underway

M&I Resource 26Mlbs
of U₃O₈ grading 0.041%
within 32Mt*

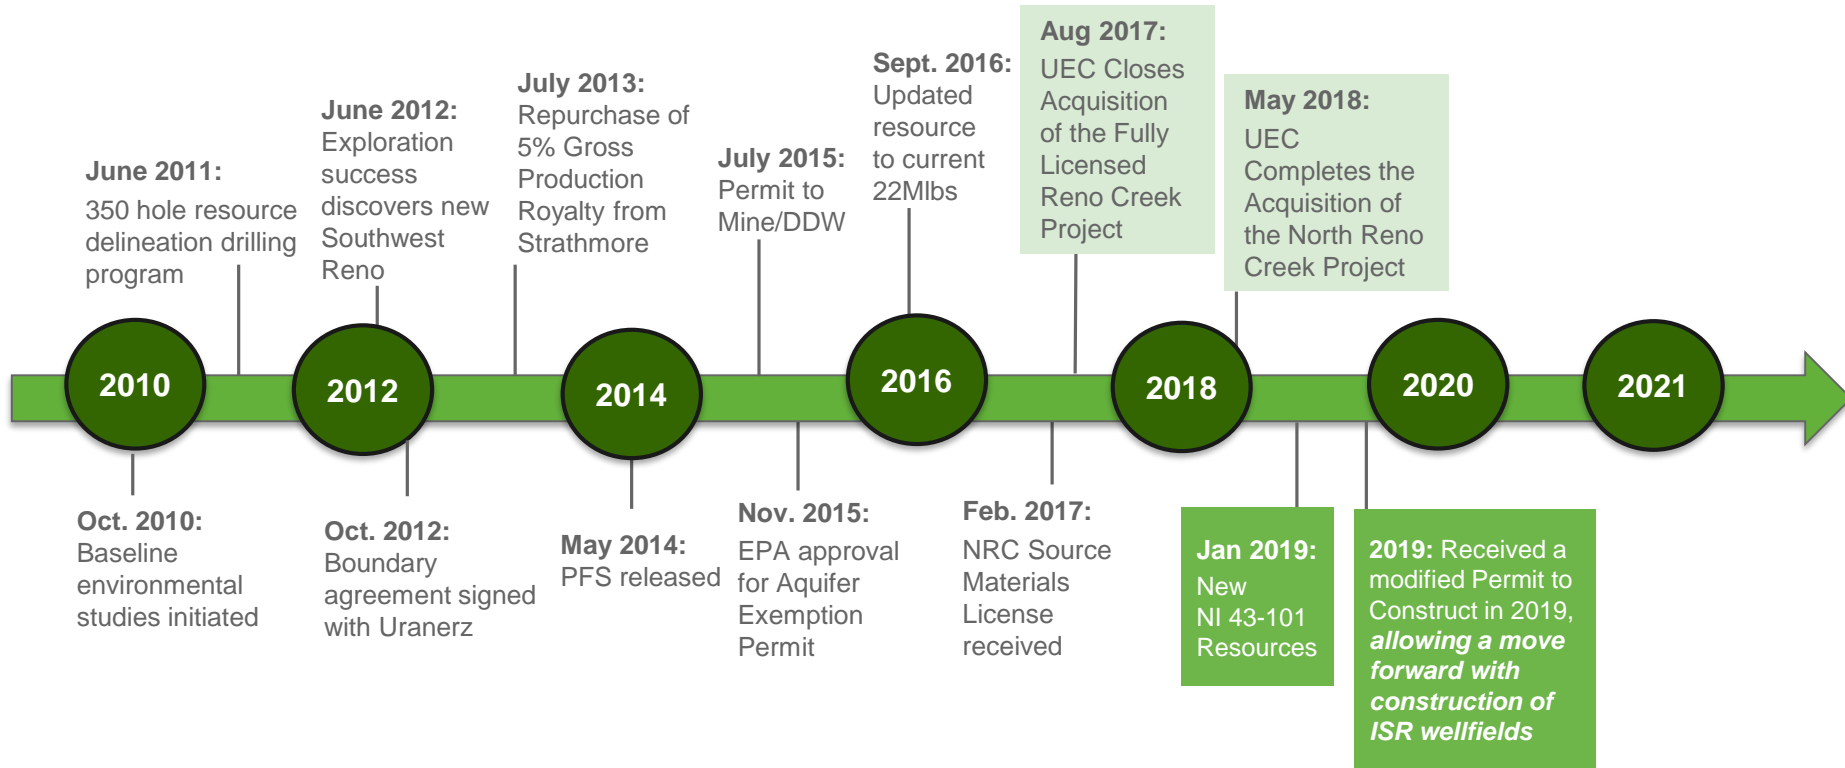

Inferred Resource 1.49Mlbs
of U₃O₈ grading 0.039%
within 1.92Mt*

First time since 1980 that the
major mineralized trends have
been consolidated

Considerable ISR exploration
and expansion potential

Production permits in place

Reno Creek: Project Timeline

* See news release dated January 15, 2019. Please refer to a detailed breakdown of NI 43-101 resources and see disclaimer on slide 2.

Anderson Project - Arizona

A Large U.S. Resource

NI 43-101 compliant resource*:

- **Indicated Resource:** 29.5Mt, 17Mlbs avg. grade of 0.029%
- **Inferred Resource:** 14.3Mt, 12Mlbs with avg. grade of 0.046%

9,852 Acres

Project located ~75 miles northwest of Phoenix, AZ

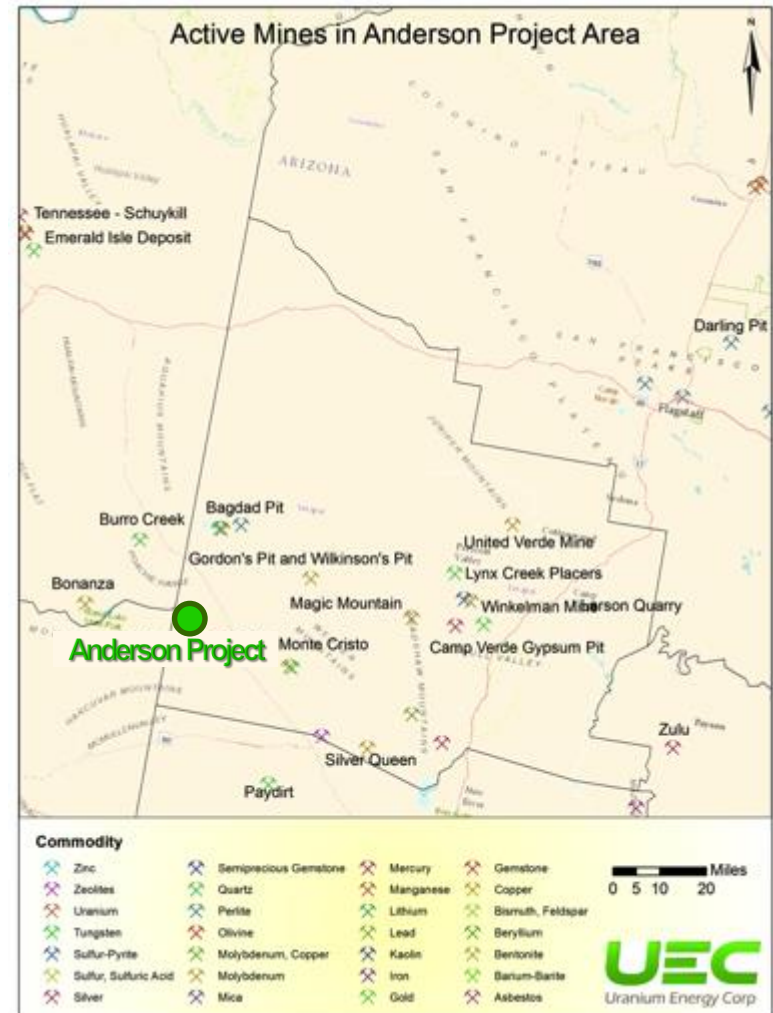

History

Between 1955-1958 with ~\$40M spent by previous operators, including Urangesellschaft

Extensive Work

Feasibility studies, milling studies, and hydrological reports previously completed by third parties

*NI 43-101 Technical Report completed and available on SEDAR and see disclaimer on slide 2

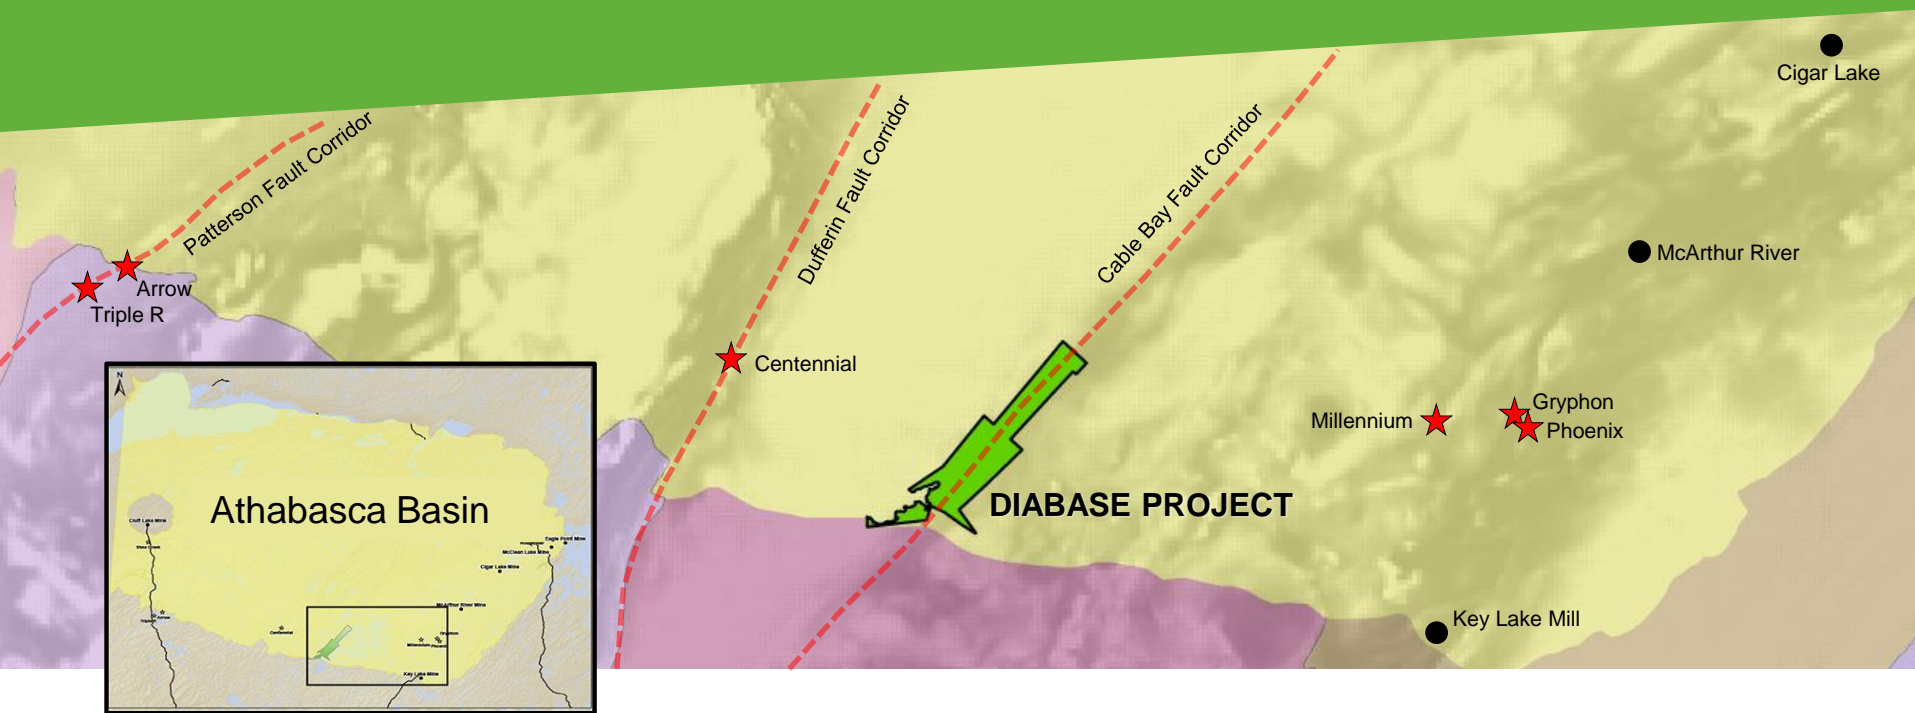

Slick Rock Project - Colorado

Technical Report	NI 43-101 Compliant Resource*: <ul style="list-style-type: none">▪ Inferred Resource: 2.5Mt, 11.6Mlbs avg. grade of 0.228%▪ Inferred Resource: 2.5Mt, 69.6Mlbs vanadium with avg. grade of 1.37%
Low CAPEX	<ul style="list-style-type: none">▪ \$21M initial CAPEX with an annual production of 438,000 pounds U3O8 + vanadium inferred
Vanadium Resource	<ul style="list-style-type: none">▪ Resource of 2.549Mt grading 1.37% V2O5 and containing 69.6Mlbs
Nearby Infrastructure	Projected sale of mined product to the White Mesa mill in nearby Blanding, UT

**NI 43-101 Technical Report completed and available on SEDAR and see the Company's disclaimer*

Diabase Project - Saskatchewan, Canada

- Athabasca Basin – Premier District
- Over \$20 million in Historical Exploration Work
- Over 21,000 meters of Diamond Drilling to date
- UEC Acquisition Cost at \$500K resulting in 0.1% Dilution to UEC Shareholders
- Diabase Project covers large land package of 21,949 hectares
- Within 75 km of Key Lake Mill

ISR District Opportunity in Paraguay

Similar geology as South Texas and leveraging ~\$50M of historic exploration work by Anschutz and Cameco, including new work completed by UEC.

Project	Historic Operator	Stage	Resource (M lbs)
Yuty	Cue Resources / Cameco	Exploration / Development	8.9Mlbs in 7.8Mt grading 0.052% U3O8 M&I and 2.2Mlbs in 2.1Mt grading 0.047% U3O8 Inferred*

Project	Historic Operator	Stage	Exploration Target (M lbs)
Oviedo	Anschutz Corp	Exploration	23 - 56Mlbs in 28.9 - 53.8Mt grading 0.04% to 0.052% U3O8*

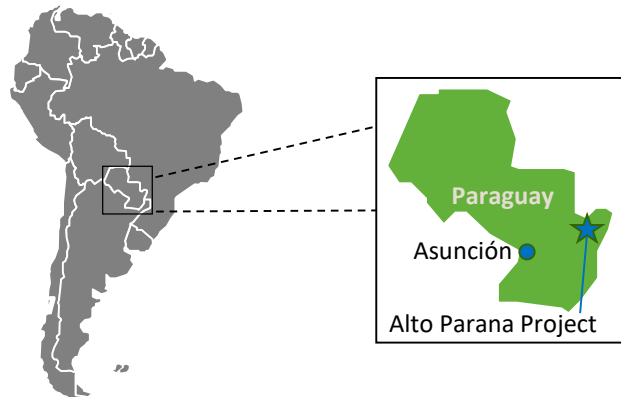

*NI 43-101 Technical Report completed and available on SEDAR and see Company's disclaimer

Alto Paraná Titanium Project

Project Overview

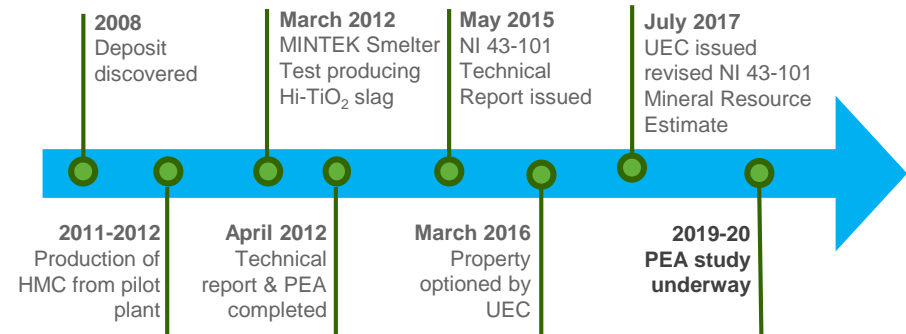

- One of the highest-grade and largest-known Ferro-Titanium deposits in the world
- NI 43-101 compliant resource with a mineral exploration claim of 70,498 hectares
- PEA study initiated in 2019 with 500 m drill campaign scheduled to complete February 2020**
- Follow-up activities include laboratory analyses and new resource estimation

Cut-Off %	% TiO ₂	% Fe ₂ O ₃	% Ilmenite calc	Tonnes Billions	Thickness (m)
6.0	7.41	23.58	13.95	4.94	6.61

*NI 43-101 Technical Report completed and available on SEDAR and see disclaimer on slide 2

Project History

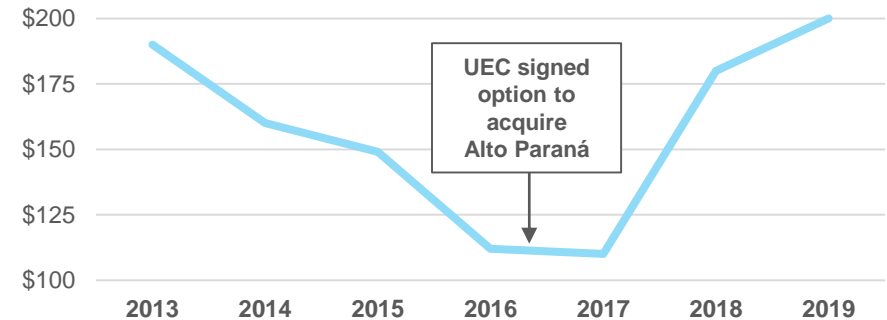

Titanium Feedstock Market – TiO₂ prices hitting 3-year highs

- 90% of TiO₂ feedstocks (ilmenite) used for pigment manufacturing
- Strong price recovery for ilmenite since 2017, with positive outlook, driven by:
 - Strong pigment demand & balanced inventory levels
 - Environmental and yield advantages of high-grade feedstock
 - High-grade feedstock supply deficit

Good fit for Alto Parana – capable of producing high-grade TiO₂ feedstock for both sulfate or chloride slag production

Price of TiO₂ Feedstock - ilmenite (USD per tonne)

Significant Supply Deficit – High Grade TiO₂ Feedstocks

Source: TZMI Nov 2019

Nuclear Energy Saves *Lives* – Improves Quality of Life

Nuclear is the safest way to make reliable electricity and has saved over 3 million lives that would have been lost prematurely to **deadly air pollution** from energy alternatives.

<https://www.nextbigfuture.com/2019/01/nuclear-power-has-saved-3-4-million-lives.html>

Germany's "Energiewende" "Failed Energy Policy"

160 Billion Euro Investment in "Green Energy" has resulted in:

- Zero Progress in Reducing Carbon Emissions
- Expensive Electricity – 50% higher than Nuclear France
- Reduced Reserve Margins – Reliability Issues
- Reliance on dirty lignite Coal and Russian Gas
- Competitive disadvantage for German Industry
- Loss of confidence in German Government

Translation "A botched job in Germany"

France Gets 72% of its Electricity from Nuclear Power

THEY ENJOY:

- ✓ Per kW carbon emissions 1/10 that of Germany
- ✓ Electricity rates 1/2 that of Germany
- ✓ Clean air with abundant and affordable energy

Policies to reduce nuclear reliance overturned.

Smart move in light of "Yellow Vest" outrage on gas tax.

Robust Nuclear Power Growth

47 Reactors Connected in 7 Years; 54 Units Under Construction

CHINA to triple nuclear power capacity by 2030

INDIA plans for 21 new nuclear reactors by 2031

RUSSIA is building 22 reactors in China, India, Turkey, Bangladesh, Egypt, Iran, Finland, Belarus, and Hungary

JAPAN recovery: 20-22% from nuclear power by 2030 – about 30 reactors. Of its 33 operable reactors, 9 reactors have restarted; 6 have been approved for restart and 10 more have applied for a restart.

U.S. is completing two new AP-1000 reactors in Georgia

U.A.E. completing construction on 4 units

U.K. upgrading nuclear fleet to new advanced reactors

No. Nuclear Reactors in 30 Countries

Source: WNA, February 29, 2020

SMR's and Advanced Reactors

An Important Emerging Market

- **SMR global market: 65-85 GWe by 2035 – small scalable reactors:**
 - Size: 5 up to 300 MWe
 - Simpler design - lower capital and operating cost
 - Cost competitive with natural gas
- **Western U.S. utilities planning for 12 of the NuScale Power SMRs to be in commercial operation by 2025**

Reactor Demand Significantly Exceeds Primary Production

Spot Prices Below Production Costs and Hedges Falling Off

2020 Demand Expected at **183Mlbs**

2020 Primary Production Expected at **142Mlbs**

2020 + 2021 Primary Production is **85Mlbs Below Requirements**

Cumulative Gap is > 565Mlbs by 2030

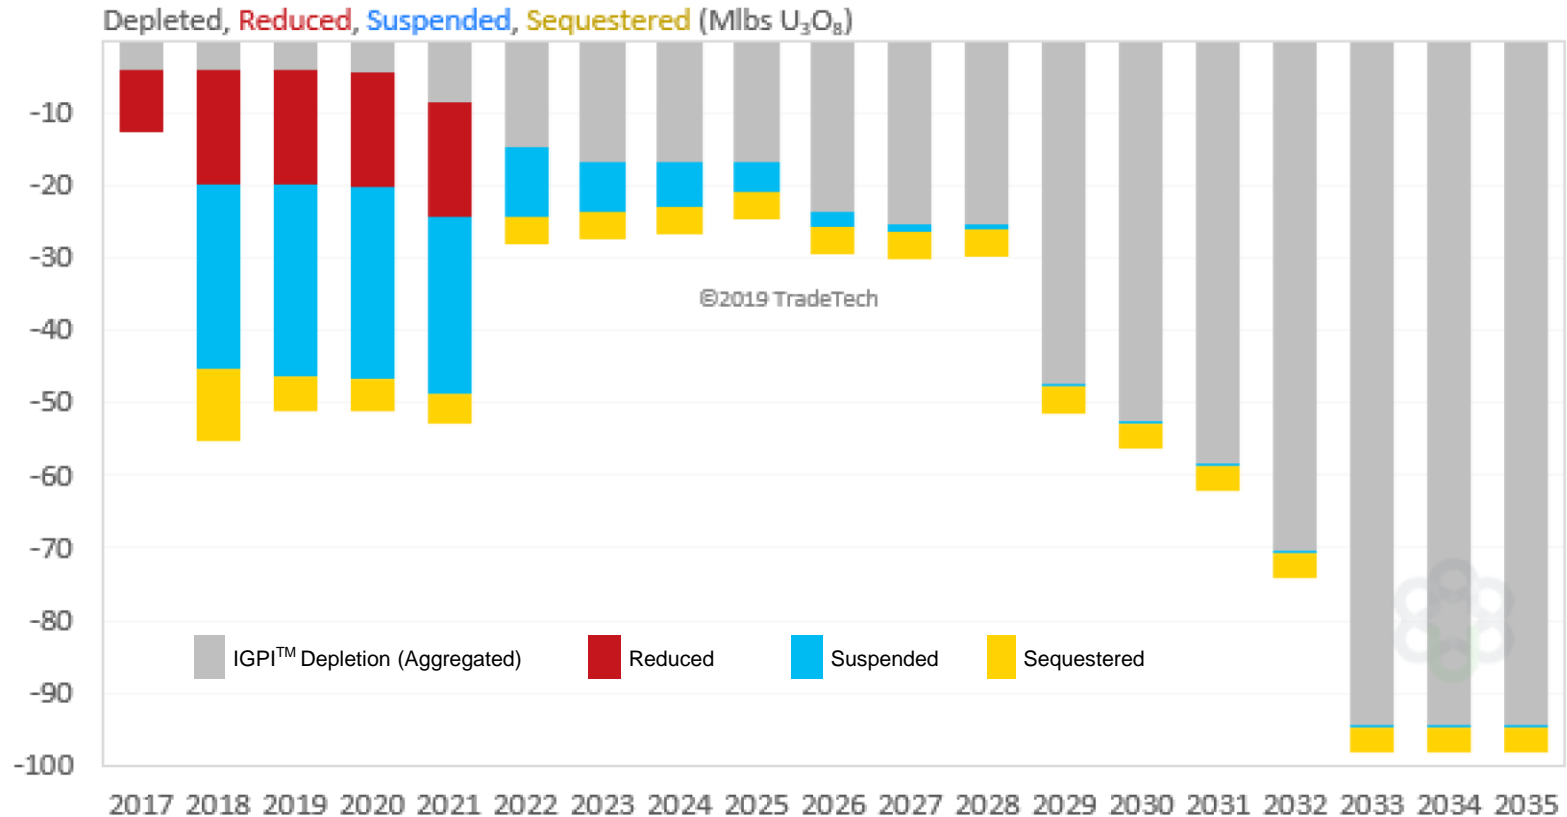

Source: UxC Market Outlook Q4 2019

Supply Cuts, Exhaustion, Reduction, Suspension

Mine Cutbacks, Depletion, Speculative Interest Accelerating Market Rebalancing

Aggregate Impact of Restricted Primary Supply

Need for New Production – Beyond Existing Mines

Trade Tech’s “Market Appetite” for New Production

**Inventory Overhang
Drawing Down**

**Uranium Price
Too Low to Stimulate
New Production
Within the Permitting
and Development
Lead Times to Bring
On New Mines**

- All assumptions are consistent with TradeTech’s latest proprietary assumptions, August 2019 (i.e. Q2 2019);
- Established Production Base shown is weighted to assimilate the challenge of existing operations remaining at full capacity over Life-of-Mine.

Utility Procurement Cycle: Old Contracts Rolling Off...New Contracts Need to be Signed

Utility Uncommitted Demand

Historic Long Term Contracting

Source: UxC Market Outlook Q4 2019

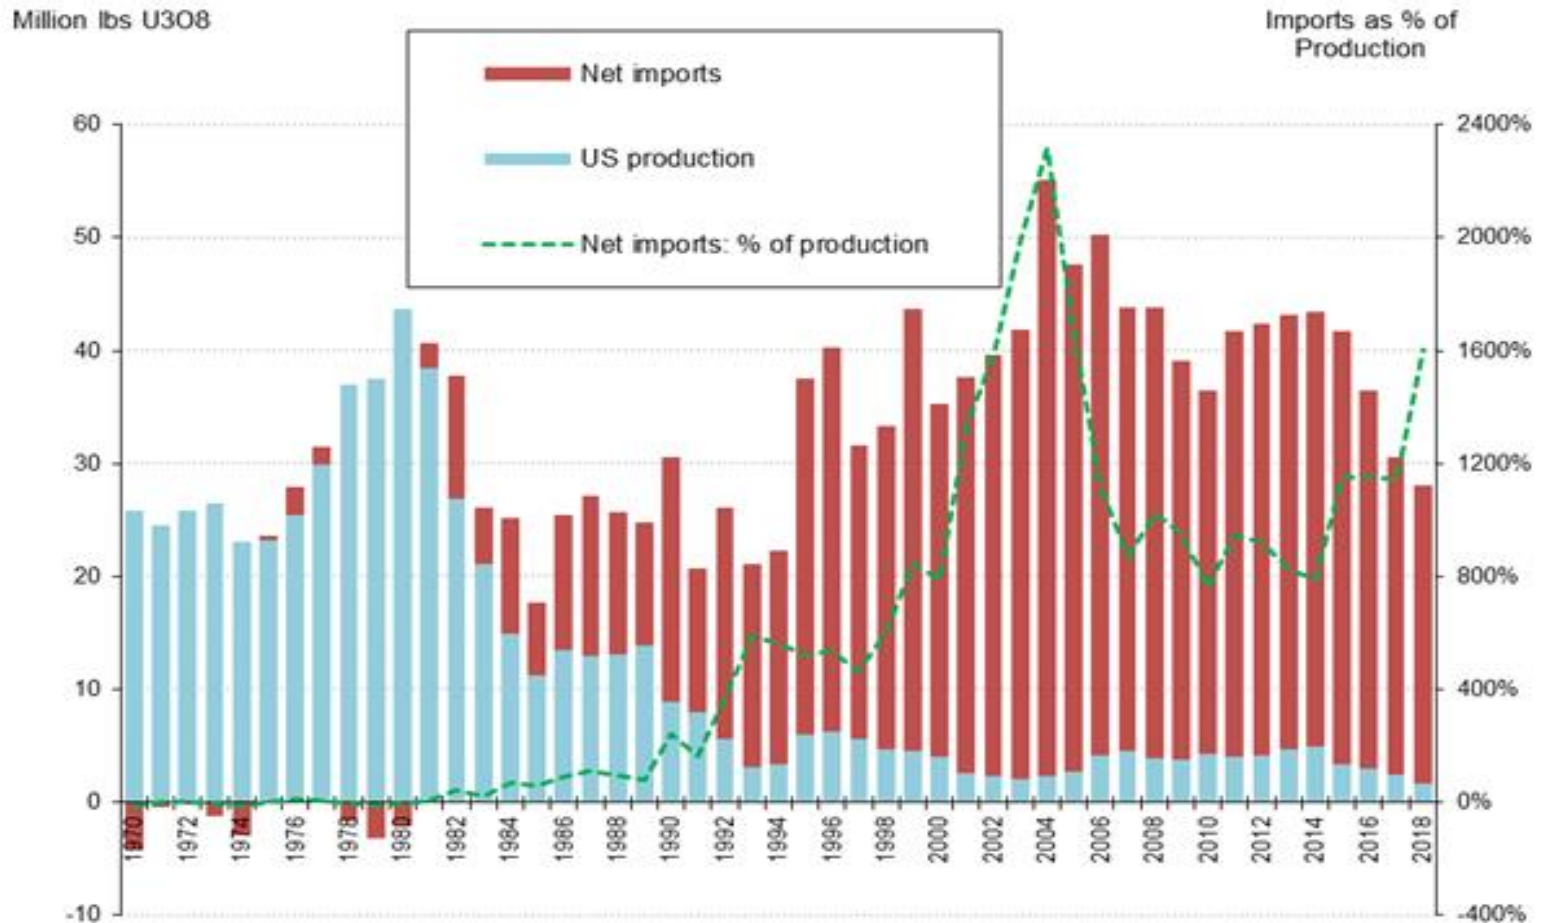

Global Cost Curve – Most U.S. Production is ISR

Source: TradeTech

Overdependence on Foreign Supplies

U.S. Uranium Imports vs. Production: 1970-2018

Source: EIA Report 2018, UxC, LLC

President Trump's FY 2021 Budget Includes 10-year, \$1.5 Billion U.S. Uranium Reserve Program

Energy Secretary Dan Brouillette: "What you've seen in the President's budget is a request for \$150 million to begin the process of purchasing uranium. But it won't stop there."

U.S. Mines Now Supply < 1% of Domestic Uranium Requirements.

Over 40% of Imports From Russia/ Kazakhstan/ Uzbekistan.

U.S. Defense needs require 100% U.S. Origin Uranium.

In the DOC 232 Process President Trump determined that a Strong Domestic Nuclear Fuel Cycle is in the Nation's National Security Interests.

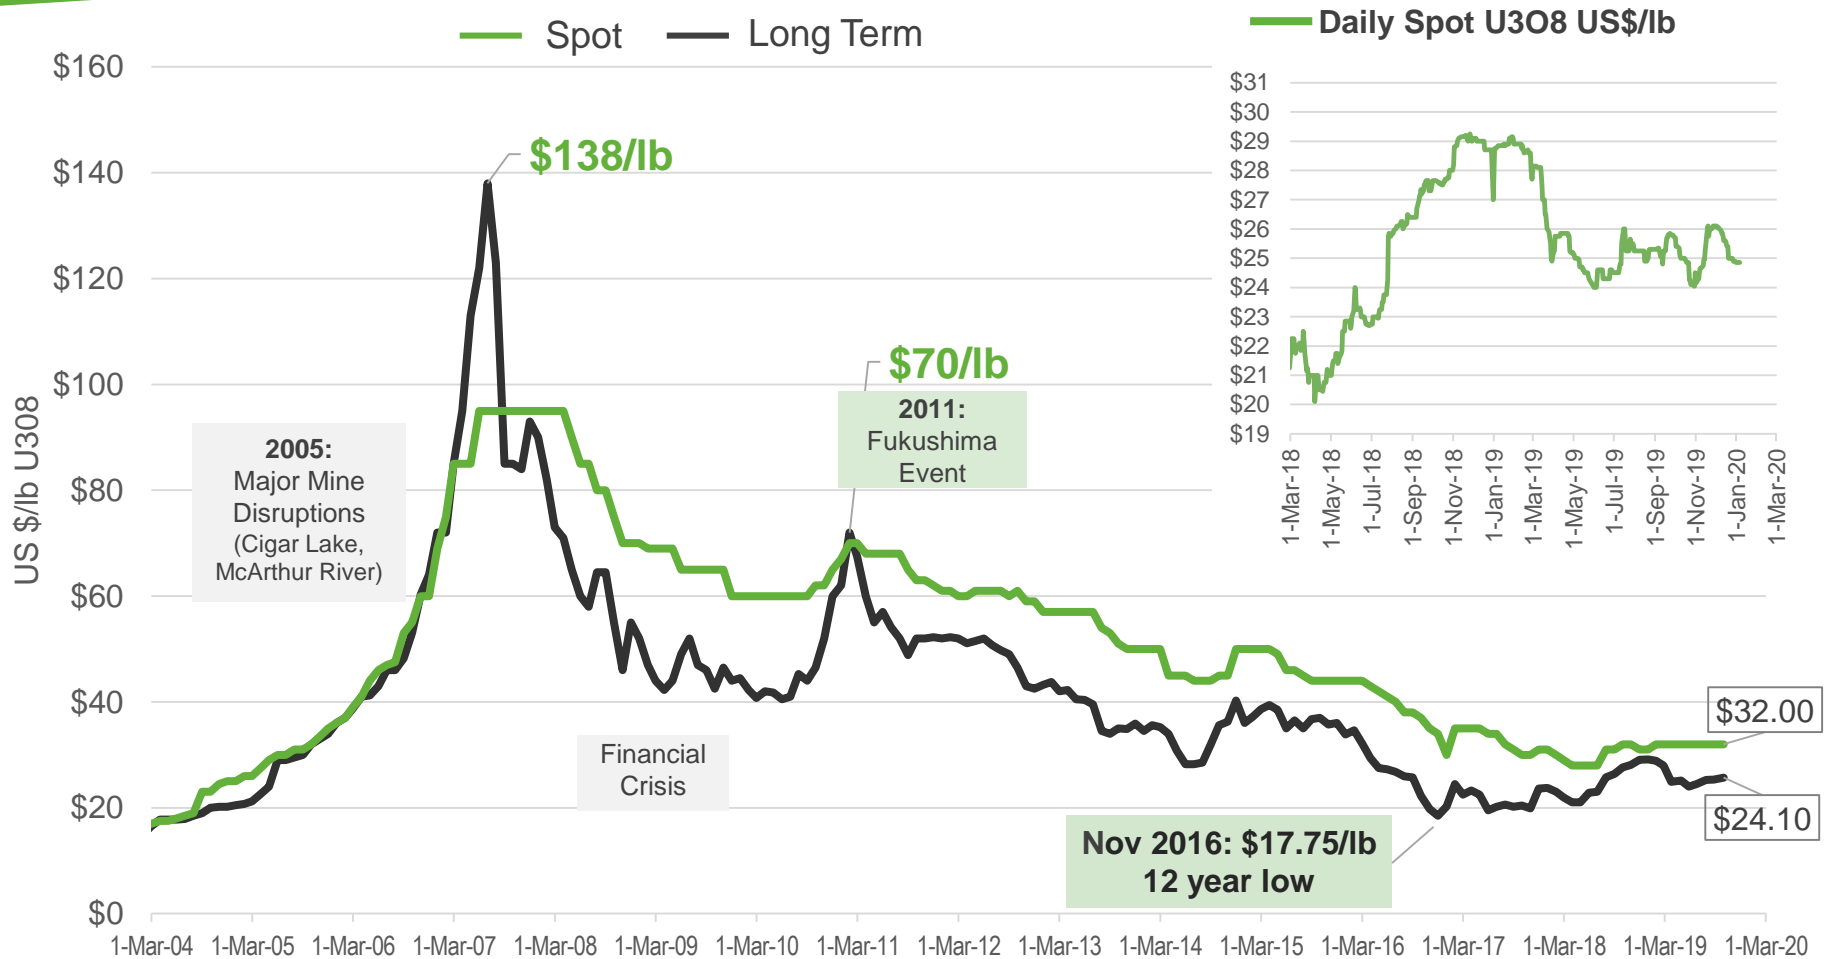

Nuclear Fuel Working Group (NFWG) established to provide recommendations for reviving and expanding domestic nuclear fuel production.

NFWG Recommendations Report to Revitalize Industry is Due Soon.

Uranium Price History

(\$24.10/ lb today – up 36% from November 2016 low)

Source: UxC, LLC, TradeTech, Numerco, March 10, 2020

Bottom Line - Positive Market Outlook

- ✓ **Demand Growth** – 47 reactors added to grid in past 7 years. Global nuclear energy generation has recovered to pre-Fukushima levels.
- ✓ **Underinvestment and Supply Cutbacks** – Kazakhs, Cameco, Orano, and others, resulting in significant primary supply deficit.
- ✓ **Lead Time to Advance Large New Mines** can be 7 to 10 years (or longer), approx. \$60/lb + incentive price
- ✓ **Accelerated Market Re-Balancing** – Growing primary production shortfall will impact market
- ✓ **Utility Procurement Cycle Looming** – “New” fundamentals have not been tested
- ✓ **Speculative Interest in Physical** – Throwing “gasoline on the fire”
- ✓ **Upward Volatility in Uranium Price is Inevitable** – despite pullbacks
- ✓ **U.S. production in 2019/2020 expected to be < 1% of U.S. reactor needs** – care and maintenance status. President’s Working Group to develop recommendations for reviving and expanding domestic nuclear fuel production due soon.

Investment Summary

- 100% unhedged.
- Pipeline of low-cost ISR projects – potential production profile of 4Mlbs/year in Texas and Wyoming.
- Fully permitted and state of the art Infrastructure advantage with Hobson Processing Plant.
- 2019/2020: Advancing production-readiness at Reno Creek and Burke Hollow ISR projects.
- Market Fundamentals continue to improve with a growing deficit between primary production and reactor requirements
