

# AMERICA'S LARGEST URANIUM MINING COMPANY

## Corporate Presentation – January 2022

URANIUM ENERGY CORP | NYSE AMERICAN: UEC | URANIUMENERGY.COM

# Disclaimer

Statements contained in this presentation which are not historical facts are forward-looking statements that involve risks, uncertainties and other factors that could cause actual results to differ materially from those expressed or implied by such forward-looking statements. Factors that could cause such differences, without limiting the generality of the following, include: risks inherent in exploration activities; volatility and sensitivity to market prices for uranium; volatility and sensitivity to capital market fluctuations; the impact of exploration competition; the ability to raise funds through private or public equity financings; imprecision in resource and reserve estimates; environmental and safety risks including increased regulatory burdens; unexpected geological or hydrological conditions; a possible deterioration in political support for nuclear energy; changes in government regulations and policies, including trade laws and policies; demand for nuclear power; failure to obtain necessary permits and approvals from government authorities; weather and other natural phenomena; and other exploration, development, operating, financial market and regulatory risks. Although Uranium Energy Corp believes that the assumptions inherent in the forward-looking statements are reasonable, undue reliance should not be placed on these statements, which only apply as of the date of this release. Uranium Energy Corp. disclaims any intention or obligation to update or revise any forward-looking statement, whether as a result of new information, future event or otherwise.'

**Notice to U.S. Investors:** The mineral resources referred to herein have been estimated in accordance with the definition standards on mineral resources of the Canadian Institute of Mining, Metallurgy and Petroleum referred to in NI 43-101 and are not compliant with U.S. Securities and Exchange Commission (the "SEC") Industry Guide 7 guidelines. In addition, measured mineral resources, indicated mineral resources and inferred mineral resources, while recognized and required by Canadian regulations, are not defined terms under SEC Industry Guide 7 and are normally not permitted to be used in reports and registration statements filed with the SEC. Accordingly, we have not reported them in the United States. Investors are cautioned not to assume that any part or all of the mineral resources in these categories will ever be converted into mineral reserves. These terms have a great amount of uncertainty as to their existence, and great uncertainty as to their economic and legal feasibility. In particular, it should be noted that mineral resources which are not mineral reserves do not have demonstrated economic viability. It cannot be assumed that all or any part of measured mineral resources, indicated mineral resources or inferred mineral resources will ever be upgraded to a higher category. In accordance with Canadian rules, estimates of inferred mineral

resources cannot form the basis of feasibility or other economic studies. Investors are cautioned not to assume that any part of the reported measured mineral resources, indicated mineral resources or inferred mineral resources referred to herein are economically or legally mineable.

## (1) Cautionary Statement on Historical Estimates

The U1A Acquisition portfolio contains (i) 37.6 million pounds  $U_3O_8$  in Measured and Indicated Resources and 4.3 million pounds  $U_3O_8$  in Inferred Resources estimated in compliance with CIM Definition Standards on Mineral Resources and Mineral Reserves and National Instrument 43-101 Standards of Disclosure for Mineral Projects adopted by Canadian Securities Administrators ("NI 43-101") through independent technical reports produced for U1A. However, as these technical reports have not been filed on www.sedar.com and the resource estimates therein have not been verified as current resources by UEC, these resource estimates should not be considered or treated as current resources and should instead be considered as "historical estimates" as defined under NI 43-101. In each instance, the reliability of the historical estimates is considered reasonable, but a Qualified Person has not done sufficient work to allow UEC to classify the historical estimates as a current Mineral Resource and, therefore, at this time UEC is not treating the historical estimates as a current Mineral Resource. The technical information in this presentation has been prepared in accordance with the Canadian regulatory requirements set out in NI 43-101 and was reviewed by Dayton Lewis, P.G., Manager of Resource Development Wyoming for the Company, a Qualified Person under NI 43-101.

**Exploration Target Disclosure:** In the Company's subject technical report all tonnages, grade, and contained pounds of uranium should not be construed to reflect a calculated mineral resource (inferred, indicated, or measured). The potential quantities and grades, as stated in the technical report, are conceptual in nature and there has been insufficient work to date to define a NI 43-101 compliant resource. Furthermore, it is uncertain if additional exploration will result in the discovery of an economic mineral resource on the project.

# America's Largest Uranium Mining Company

Fastest growing, 100% unhedged pure play uranium company - listed on the NYSE American

Production ready, low-cost ISR mining - largest resource base of fully permitted ISR projects of any U.S. based producer

Production profile of 6.5 M lbs.  $U_3O_8$  / yr based on permitted and installed capacity of Wyoming and South Texas hub-and-spoke operations

Physical uranium portfolio of 4.1 M lbs. U.S. warehoused  $U_3O_8$

Strong Balance sheet - \$120 million of cash and liquid assets

UEC'S HOBSON PLANT – TEXAS HUB & SPOKE OPERATIONS

UEC'S IRIGARAY PROCESSING PLANT – WYOMING HUB & SPOKE OPERATIONS

# UEC Completes Acquisition of Uranium One Americas – Creating America’s Largest Uranium Mining Company

<b>HIGHLY ACCRETIVE TRANSACTION</b>	Doubles production capacity in three key categories: total number of permitted U.S. ISR projects, resources, and processing infrastructure.
<b>WYOMING HUB-AND-SPOKE</b>	Creates Wyoming hub-and-spoke operations, anchored by U1A’s Irigaray plant - one of the largest central processing facilities in the U.S. - licensed capacity of 2.5 M lbs. U <sub>3</sub> O <sub>8</sub> / year.
<b>PRODUCTION READY</b>	Incorporates U1A’s production-ready assets - Christensen Ranch ISR Project + four fully installed wellfields.
<b>RENO CREEK SYNERGIES</b>	Anticipates significant capital expenditure savings and deep operating synergies with UEC’s permitted and nearby Reno Creek ISR Project - 45 miles away from Irigaray.
<b>RESOURCE EXPANSION</b>	Secured ~37.6 M lbs. U <sub>3</sub> O <sub>8</sub> in historically estimated Measured and Indicated Resources and 4.3 M lbs. U <sub>3</sub> O <sub>8</sub> in historically estimated Inferred Resources + considerable growth potential based on independent technical reports prepared for U1A. <sup>(*)(1)</sup>
<b>DOMINANT LAND PACKAGE</b>	Added ~100,000 acres to UEC’s Wyoming land package, holdings are now ~118,000 acres in Wyoming’s prolific uranium producing Power River and Great Divide Basins

\*See news release dated Dec 20, 2021. <sup>(1)</sup> Refer to a detailed breakdown of NI 43-101 resources and disclaimer on slide 2.

# Diversified Asset Portfolio - Low-Cost ISR & Production Ready

**42 M lbs. of Historical Resources in Wyoming<sup>(1)</sup>  
2.5 M lbs. of Permitted Annual Capacity**

**U1A Wyoming Portfolio – (Near Term ISR Production)**

Stage	Stage	Resources (M lbs.)	
		M&I	Inferred
Near Term	(NT)	28.43	1.44
Development	(D)	9.22	2.84
Total in all Categories		37.65	4.28

**Reno Creek ISR Project (Approved Permit to Mine)**

Project Name	Stage	Resources (M lbs.)	
		M&I	Inferred
Reno Creek	(NT)	26.0	1.49
Permitted for 2M lbs./year production			

**Infrastructure - Texas**

Hobson Plant – Installed Production Capacity of 2M lbs./year

**Texas Hub & Spoke ISR Portfolio**

Project Name	Stage	Resources (M lbs.)	
		M&I	Inferred
Palangana (Fully Permitted)	(NT)	1.1	1.2
Goliad (Fully Permitted)	(NT)	5.5	1.5
Burke Hollow (Fully Permitted)	(NT)	-	7.1
Salvo	(E)	-	2.8

- Uranium Resources
- Uranium Inventory
- Titanium
- Vanadium

**Stage:**  
(E) Exploration  
(D) In Development  
(NT) Near Term Production

**4.1 M lbs. in physical uranium portfolio, \$32/lb avg. cost to purchase U.S. warehoused uranium**

**Canada - Athabasca Basin**

Project Name	Stage	Resources (M lbs.)	
		M&I	Inferred
Diabase	(E)	NA	NA

**U.S. Hardrock Pipeline (Uranium & Vanadium)**

Project Name	Stage	Resources (M lbs.)	
		M&I	Inferred
Anderson	(D)	17.0	12.0
Workman	(D)	-	5.5
Slick Rock (U308)	(D)	-	11.6
Slick Rock (V205)	(D)	-	69.6

**Paraguay ISR Uranium Portfolio**

Project Name	Stage	Resources (M lbs.)	
		M&I	Inferred
Yuty	(D)	8.9	2.2
Oviedo	(E)	-	23.56
Exploration target			

**Paraguay Titanium Business**

Alto Paraná  
4.94 Billion Tons Grading 7.41% TiO<sub>2</sub> and 23.6% Fe<sub>2</sub>O<sub>3</sub>

**Strategic Equity Interest**

**URANIUM ROYALTY CORP** 18% stake in the Uranium Royalty Corp

(1) The U1A acquisition portfolio contains historical resource estimates in Wyoming. See slide 2 for disclaimer and a detailed breakdown of NI 43-101 resources.

# Environmental Social & Governance Program

A Responsible Steward of Our Environment, Protecting Our Employees & Communities Where We Operate

## UEC ISR URANIUM SUPPORTS ESG ENERGY GOALS:

- ISR projects have a low-carbon profile, contributes to “net zero” targets
- Uranium fuels safe, clean-air nuclear energy to produce reliable carbon free electricity

## UEC ACTIONS:

- Implementing a full ESG program for Company operations, including corporate governance and stakeholder interests
- Combining, existing company social responsibility practices with new ESG initiatives
- Completed first phase of emissions quantification for the Palangana ISR mine and Hobson processing facility
- Evaluating new carbon emission reduction technologies for UEC production facilities

# Robust Nuclear Power Growth

442

Operable Reactors  
Worldwide

51

Units Under  
Construction

60

New Reactors  
Connected since 2012

3.1%

CAGR Uranium Demand  
Growth Expected  
(2020-2040)<sup>1</sup>

**CHINA** is planning at least 150 new reactors in the next 15 years<sup>2</sup>

**INDIA** plans for 21 new reactors by 2031

**U.A.E.** completed 3 reactors; 1 unit under construction<sup>3</sup>

**U.K.** upgrading nuclear fleet to new advanced reactors

**RUSSIA** is building 36 reactors in China, India, Bangladesh, Turkey, Egypt, Iran, Finland, Belarus, Slovakia, Armenia, Uzbekistan and Hungary

**JAPAN** 33 operable reactors, Energy Plan targeting 20-22% nuclear power, nuclear deemed essential to achieve net-zero target by 2050

**U.S.** is completing two new AP-1000 reactors in Georgia and has maintained a 20% market share for 30 years with power uprates and efficiency = to 32 new reactors as electricity demand grew over 36% from 1989-2019 – A Stealth Growth Story!

Source: IAEA PRIS Jan 3, 2022; <sup>(1)</sup> WNA Fuel Report Sep 2021; <sup>(2)</sup> Bloomberg Green Nov 2, 2021; <sup>(3)</sup> WNN; NEI Dec 2020, March 2021

# Nuclear Power is Critical to U.S. Energy

**Bi-Partisan Support** – All-time high in public support with Democrat and Republican voters now equally in favor of nuclear energy.

The U.S. Senate has passed a **Bipartisan Infrastructure Bill** that provides a \$6B nuclear credit program for qualifying nuclear plants with priority given to reactors using uranium produced in the United States

**The U.S. has set a goal to reach 100% carbon pollution-free electricity by 2035 –** Nuclear Energy “Absolutely Essential” (US Energy Secretary Jennifer Granholm)

**2nd Largest Source of Electricity** – Largest Source of Carbon-Free Power Generation

**No U.S. Uranium Production** Despite Operating the World’s Largest Nuclear Reactor Fleet

**Strategic Uranium Reserve – \$1.5 Billion Program**  
Over 10 Years for Domestic Uranium and Conversion  
(Appropriations for \$75 million scheduled for 2022)

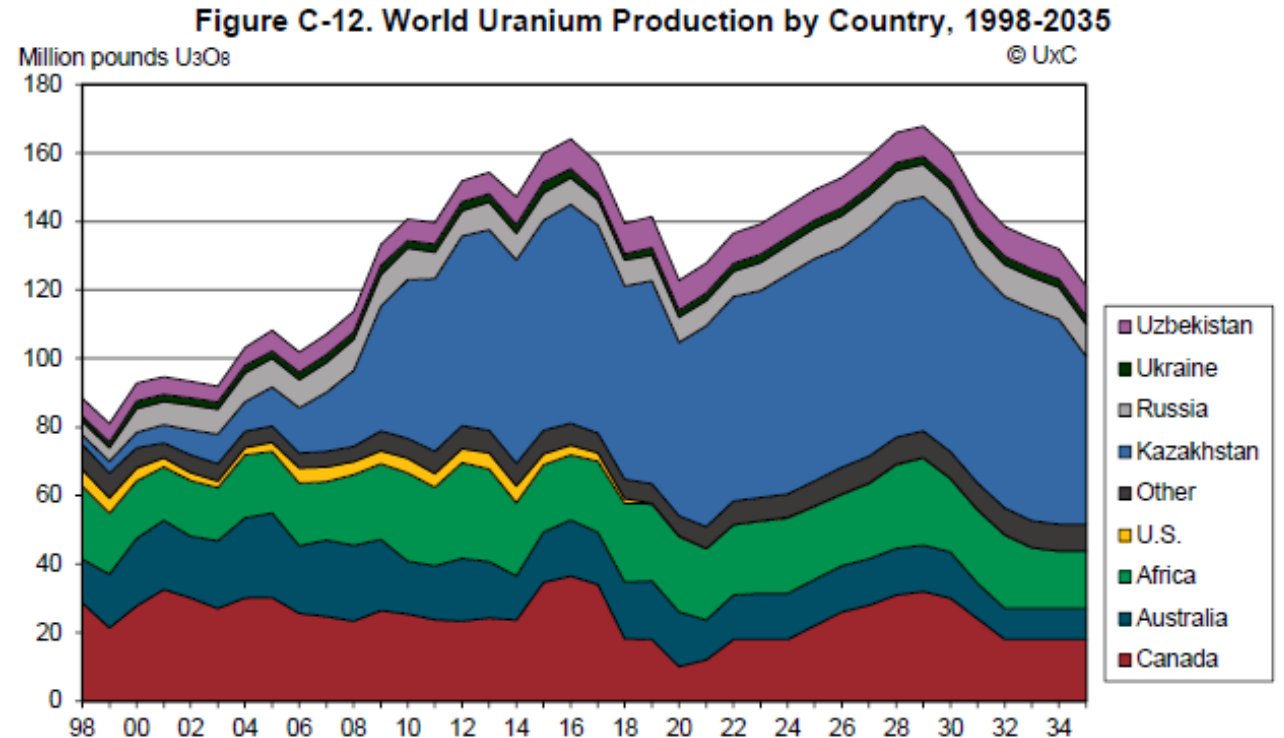

# Geopolitical Risk With High Production Concentration

“Increasing price volatility, tightening supply in the spot market, and an increasing realization that long-term supply is under threat following a decade-long bear market, are all contributing to nuclear utilities becoming more concerned about security of supply. Unrest in Kazakhstan could provide further impetus behind the nascent uranium contracting cycle.”

We expect continued upward pressure on spot and term uranium prices in the coming months.”

Equity Research Note, January 5, 2022

Source: UxC Market Outlook Q3 2021

# Uranium Spot Price Appreciation Increases with Entry of Financial Players led by Sprott Uranium Trust

At \$45.75/lb, price still well below 2011 at \$70 high and incentive levels for new primary production

Source: TradeTech, Numerco, UxC, LLC: [www.uxc.com](http://www.uxc.com)

# Texas & Wyoming ISR Production Profile

## Wyoming Hub & Spoke ISR Portfolio

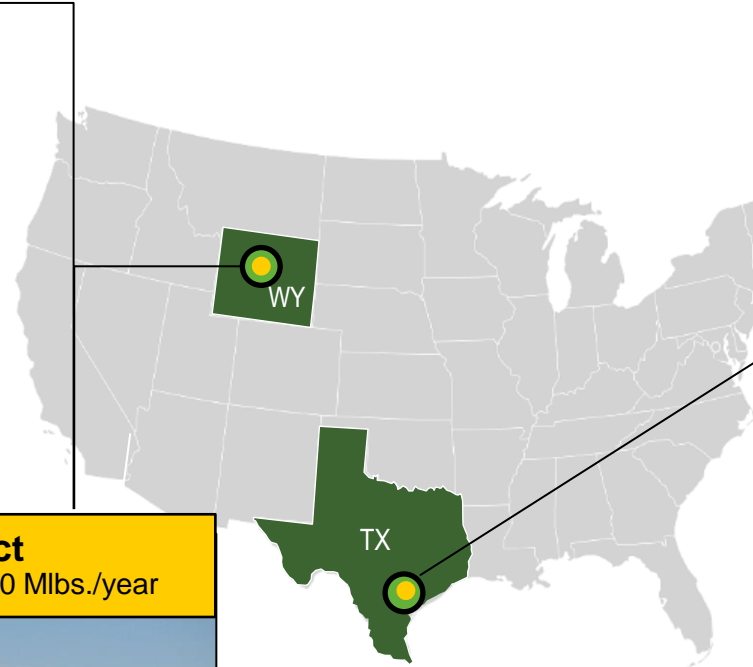

### Irigaray Processing Plant

Licensed Production Capacity of 2.5 Mlbs./year

### Reno Creek Project

Licensed Production Capacity of 2.0 Mlbs./year

## Texas Hub & Spoke ISR Portfolio

### Hobson Processing Plant

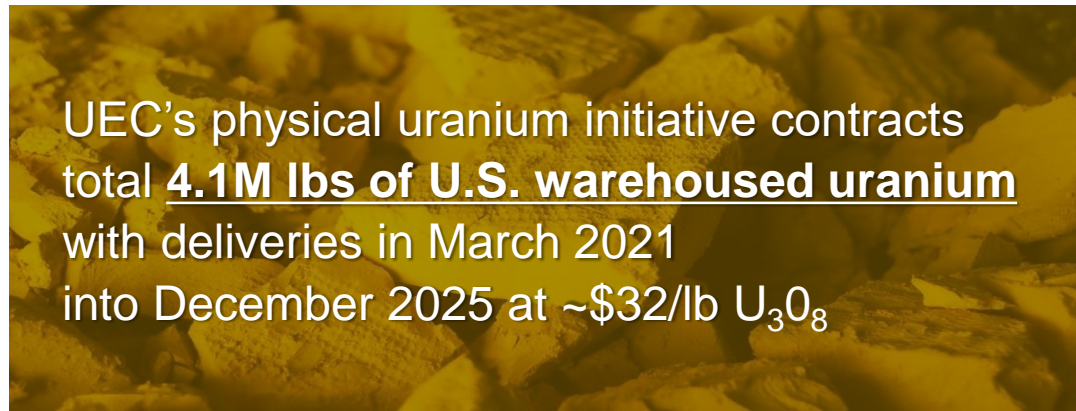

Installed Production Capacity of 2 Mlbs./year

# Physical Uranium Initiative

Purchasing drummed uranium at prevailing spot prices below most global industry mining costs:

- ✓ **Bolsters UEC balance sheet** as uranium prices appreciate
- ✓ **Provides strategic inventory** to support future marketing and production efforts + accelerate cashflows
- ✓ **Increases the availability of our Texas and Wyoming production capacity** for emerging U.S. origin specific opportunities

# UEC At a Glance

Member of the Russell 2000® Index

<b>Cash, Equity and Inventory Holdings<sup>(1,2,3)</sup></b>	<b>\$120 million</b>		
<b>Share Structure</b>	<b>267.2 M</b> Outstanding	<b>4.5 M</b> Warrants + Options & Stock Awards	<b>11.3 M</b> Fully Diluted <sup>(4)</sup>
<b>Recent Activity</b>	<b>\$3.76</b> As of Jan 10, 2021	<b>8,911,434</b> Avg. Daily Vol. (3-mo)	
<b>Market Cap</b>	<b>\$1.0 B</b> As of Jan 10, 2021	<b>\$10 M</b> Debt	
<b>Top Shareholders</b>	UEC Team, Blackrock, Vanguard Group, State Street, Fidelity, Northern Trust, UBS, CEF Holdings, Sprott, KCR Fund, and Global X Management		
<b>ANALYST COVERAGE</b>	<b>Heiko Ihle</b> , H.C. Wainwright & Co. <b>Katie Lachapelle</b> , Canaccord Genuity <b>Mitch Vanderydt</b> , Eight Capital		<b>Colin Healey</b> , Haywood Securities Inc. <b>Joseph Reagor</b> , ROTH Capital Partners

(1) See UEC news release dated December 20, 2021

(2) Equity holdings include 15M shares of Uranium Royalty Corp (UROY) having a trading price of US\$4.82 at closing on October 31, 2021

(3) As of October 31, 2021, Inventory holdings include 1.2M lbs of delivered U<sub>3</sub>O<sub>8</sub>, which is part of the 4.1M lbs physical uranium with multiple deliveries between March 2021 to December 2025

(4) As of December 14, 2021

(5) In November 2020 and March 2021, UEC made voluntary principal repayments totaling \$10M, reducing the total principal outstanding to \$10M

# 840 Years of Combined Experience in the Uranium Industry

**Amir Adnani**

**President, CEO, Director**

An entrepreneur, founding CEO of UEC, founder and Chairman of GoldMining Inc., with extensive experience building natural resource companies.

**Spencer Abraham**

**Chairman, Board of Directors**

Served as a U.S. Senator from 1995 to 2001, as Secretary of Energy from 2001 to 2005 and previously as non-executive Chairman of Areva's U.S. board.

**Scott Melbye**

**Executive Vice President**

37 years of experience in senior roles with uranium majors, Cameco, Uranium One, and Kazatomprom. President of Uranium Producers of America and former Chair of the World Nuclear Fuel Market.

**Robert Underdown**

**VP of Production - Texas**

Has held senior operational positions at ISR uranium mines in Texas for over 35 years.

**Donna Wichers**

**VP of Wyoming Operations**

Former COO and board member of Uranium One Americas. Over 40 years of experience in senior roles with ISR and conventional uranium mines in the U.S.

**F. P. "Butch" Powell**

**VP of Marketing and Sales**

More than 30 years' experience in the nuclear fuel industry - also serving as Chair of the Nuclear Energy Institute's Fuel Suppliers Committee.

**Clyde Yancey**

**VP of Exploration**

Over 35 years of experience in uranium exploration in North and South America.

**Andy Kurrus**

**VP of Resource Development**

Over 30 years experience with uranium exploration in the U.S.

**Craig Wall**

**VP of Environmental, Health & Safety**

Over 15 years of permitting ISR projects in the U.S. ESG project manager. Chairman of Texas Mining & Reclamation Association uranium sub-committee.

# Texas Hub & Spoke Production Strategy

**Hobson is fully licensed and permitted**

**The Processing Plant has a 2M lbs. / year physical capacity**

# Palangana ISR Mine

## First Producing Mine

### Proof of Concept

**\$10M**  
Initial CAPEX

6 months construction timeline

**Production Ready**

- Low cash-cost of \$21.77/lb during operation
- Fully permitted including expanded mine permit
- Received 10-year renewal permits in 2019

**Similar Costs for Future Projects**

- The major permits for production have been issued for Goliad and Burke Hollow

**In-Situ Recovery (ISR) Technology**  
Low Cost & Environmentally Friendly

**Palangana Production Area 1 (PA-1)**

**Palangana Ion Exchange Facility**

**UEC**

**Resin Hauling Truck And Trailer**

# Burke Hollow ISR Project, South Texas

## Advancing Towards Uranium Extraction

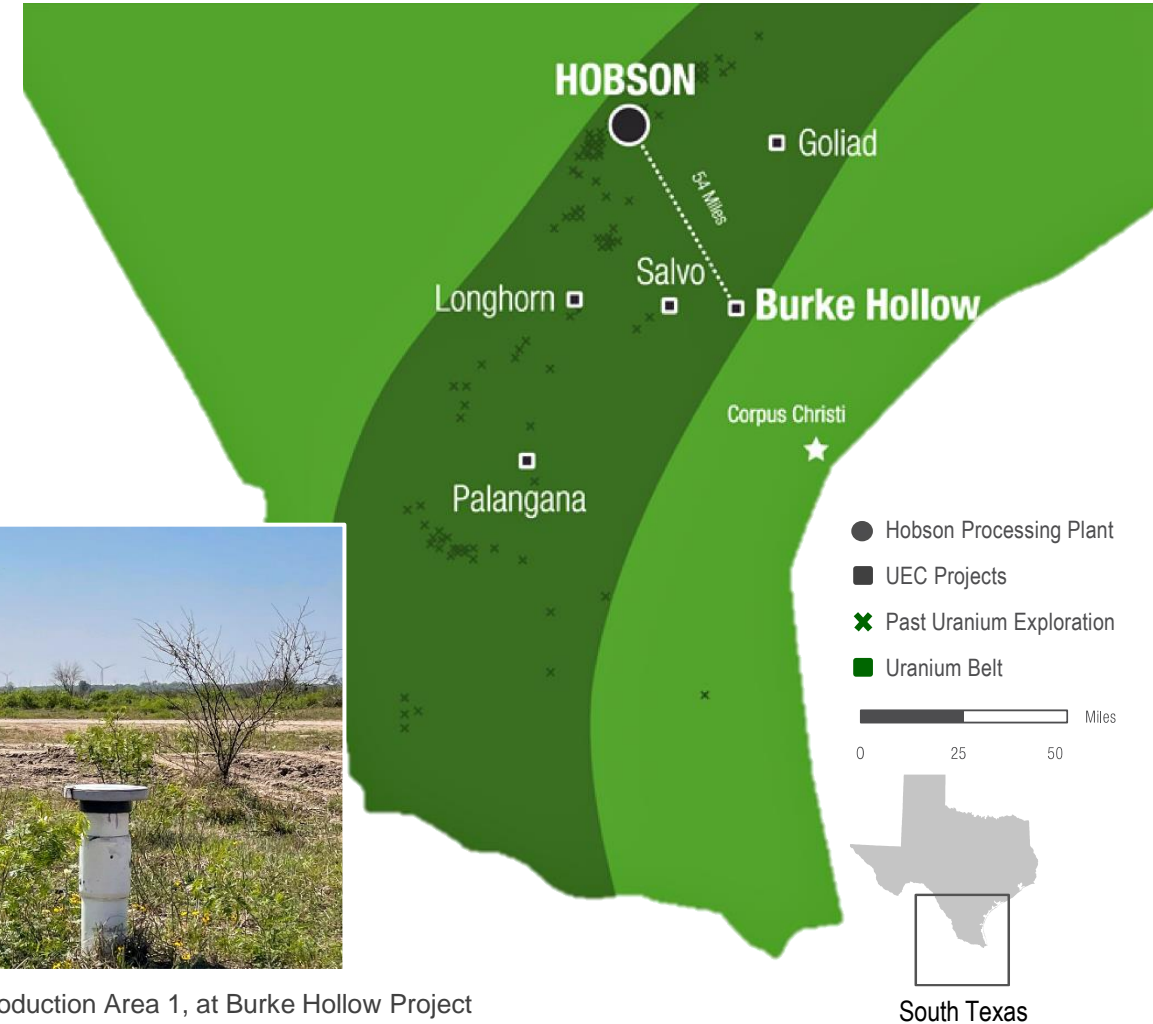

- Discovery of six trends since 2012
- 7.09M lbs. in 4.06Mt grading 0.088%  $U_3O_8$
- Leach amenability testing indicates recovery greater than 90%
- ~20,000 acres located ~50 miles from Hobson Processing Plant
- 50% of the property unexplored

## Final permits issued:

- ✓ Mine Production Area
- ✓ Two Class I disposal wells
- ✓ Aquifer Exemption
- ✓ Radioactive Materials License

Cased monitor wells in the Production Area 1, at Burke Hollow Project

See news releases dated Jan 26, Apr 14, and Oct 28, 2021. Refer to a detailed breakdown of NI 43-101 resources and disclaimer on slide 2.

# Burke Hollow ISR Project, South Texas

**The Newest & Largest ISR Wellfield  
Being Developed in the U.S.**

## *2021 Production Area Development*

- ✓ 126 resource delineation holes and 43 additional monitor wells were completed
- ✓ Permitting activities to include sampling and pumping tests in anticipation of commencing production activities

See news releases dated Jan 26, Apr 14, and Oct 28, 2021. Refer to a detailed breakdown of NI 43-101 resources and disclaimer on slide 2.

# Wyoming Hub & Spoke Production Strategy

# Irigaray & Christensen Ranch

Licensed Capacity of 2.5 M lbs. Per Year

15.5 M lbs Historic M&I and  
0.14 M lbs Inferred U<sub>3</sub>O<sub>8</sub> Resources\*

- One of the largest ISR central processing facilities in the U.S. - licensed capacity of 2.5 M lbs. U<sub>3</sub>O<sub>8</sub> / year
- Plant and infrastructure production ready - four fully installed wellfields on standby
- Anticipate significant capital expenditure savings and deep operating synergies with UEC's permitted and nearby Reno Creek ISR Project - 45 miles away from Irigaray
- Resin Processing Agreement in place with 3rd party at Irigaray through 2024
- Resin Capture and Processing Agreement in place with 3rd party at CR and IR through 2025

Christensen Satellite Plant

Irigaray CPP

Header House MU7

Christensen Satellite Plant

\*See Note 1 on slide 2 – disclaimer

# Ludeman ISR Project

## Permitted, Construction Ready

9.7 M lbs Historic M&I | 1.3 M lbs Historic Inferred\*

- Most of the project area was held by Power Resources (Cameco) until 2003, after which Energy Metals (precursor to U1A) acquired the properties
- Engineering completed for satellite plant facility, infrastructure, and evaporation ponds, with mine design completed for first mine unit
- Additional exploration upside along known uranium trends
- Satellite operation to Irigaray, 120 miles by road to the northwest

# Moore Ranch ISR Project

## Permitted, Construction Ready

3.21 M lbs. Historic M&I | 0.04 M lbs Historic Inferred\*

- Fully permitted - previously developed by Conoco in the early 1980's.
- Delineation drilling and wellfield pattern design complete
- Monitoring well installation completed on Wellfield 2
- Pilot operations to determine wellfield flow conditions successful
- Additional exploration upside along known uranium trends
- Satellite operation to Irigaray, 55 miles by road to the northwest

# Reno Creek ISR Project Pre-Feasibility Study Underway

**M&I Resource 26M lbs.**  
of  $U_3O_8$  grading 0.041% within 32Mt\*

**Inferred Resource 1.49M lbs.**  
of  $U_3O_8$  grading 0.039% within 1.92Mt\*

First time since 1980 that the major mineralized trends have been consolidated

Considerable ISR exploration and expansion potential

Production permits in place

# Reno Creek ISR Project

*The largest permitted, pre-construction ISR uranium project in the U.S.*

26 M lbs. M&I | 1.5 M lbs. Inferred U<sub>3</sub>O<sub>8</sub>

- Strategic Location within the Heart of the Powder River Basin, Wyoming
- First time since 1980 that the major mineralized trends have been consolidated under one owner
- Received a modified Permit to Construct in 2019, allowing the construction of the Central Processing Plant (CPP) and ISR wellfields
- 45 miles by road from Irigaray CPP
- Significant CAPEX savings expected

## Other Projects

**Anderson Project – Arizona**

**Slick Rock Project – Colorado**

**Yuti, Oviedo ISR Projects – Paraguay**

**Alto Paraná Titanium Project – Paraguay**

# Anderson Project - Arizona

<p><b>A Large U.S. Resource</b></p>	<p><b>NI 43-101 compliant resource*:</b></p> <ul style="list-style-type: none"> <li>▪ <b>Indicated Resource:</b> 29.5Mt, 17M lbs. avg. grade of 0.029%</li> <li>▪ <b>Inferred Resource:</b> 14.3Mt, 12M lbs. with avg. grade of 0.046%</li> </ul>
<p><b>9,852 Acres</b></p>	<p>Project located ~75 miles northwest of Phoenix, AZ</p>
<p><b>History</b></p>	<p>Between 1955-1958 with ~\$40M spent by previous operators, including Urangesellschaft</p>
<p><b>Extensive Work</b></p>	<p>Feasibility studies, milling studies, and hydrological reports previously completed by third parties</p>

\*NI 43-101 Technical Report completed and available on SEDAR and see disclaimer on slide 2

# Slick Rock Project - Colorado

<b>Technical Report</b>	<b>NI 43-101 Compliant Resource*:</b> <ul style="list-style-type: none"><li>▪ <b>Inferred Resource:</b> 2.5Mt, 11.6M lbs. avg. grade of 0.228%</li><li>▪ <b>Inferred Resource:</b> 2.5Mt, 69.6M lbs. vanadium with avg. grade of 1.37%</li></ul>
<b>Low CAPEX</b>	<ul style="list-style-type: none"><li>▪ \$21M initial CAPEX with an annual production of 438,000 pounds U<sub>3</sub>O<sub>8</sub> + vanadium inferred</li></ul>
<b>Vanadium Resource</b>	<ul style="list-style-type: none"><li>▪ Resource of 2.549Mt grading 1.37% V<sub>2</sub>O<sub>5</sub> and containing 69.6M lbs.</li></ul>
<b>Nearby Infrastructure</b>	Projected sale of mined product to the White Mesa mill in nearby Blanding, UT

\*NI 43-101 Technical Report completed and available on SEDAR and see the Company's disclaimer

# ISR District Opportunity in Paraguay

Similar geology as South Texas and leveraging ~\$50M of historic exploration work by Anschutz and Cameco, including new work completed by UEC.

Project	Historic Operator	Stage	Resource (M lbs)
Yuty	Cue Resources / Cameco	Exploration / Development	8.9M lbs. in 7.8Mt grading 0.052% U <sub>3</sub> O <sub>8</sub> M&I and 2.2M lbs. in 2.1Mt grading 0.047% U <sub>3</sub> O <sub>8</sub> Inferred*

Project	Historic Operator	Stage	Exploration Target (M lbs)
Oviedo	Anschutz Corp	Exploration	23 - 56M lbs. in 28.9 - 53.8Mt grading 0.04% to 0.052% U <sub>3</sub> O <sub>8</sub> *

\*NI 43-101 Technical Report completed and available on SEDAR and see Company's disclaimer

# Alto Paraná Titanium Project

## Project Overview

- One of the highest-grade and largest-known Ferro-Titanium deposits in the world
- NI 43-101 compliant resource with a mineral exploration claim of 70,498 hectares
- The PEA's first phase was completed in early 2021 and Resource estimation updated
- **Valuation and Market study completed and PEA Phase 2 underway**

Cut-Off %	% TiO <sub>2</sub>	% Fe <sub>2</sub> O <sub>3</sub>	% Ilmenite calc	Tonnes Billions	Thickness (m)
6.0	7.41	23.58	13.95	4.94	6.61

## Project History

\*NI 43-101 Technical Report completed and available on SEDAR and see disclaimer on slide 2

# Titanium Feedstock Market – TiO<sub>2</sub> prices hitting 3-year highs

- 90% of TiO<sub>2</sub> feedstocks (ilmenite) used for pigment manufacturing
- Strong price recovery for ilmenite since 2017, with positive outlook, driven by:
  - Strong pigment demand & supply constraints
  - Stringent environmental regulations driving high-grade feedstock fundamentals
  - Anticipated high-grade feedstock supply deficit

**Good fit for Alto Parana – capable of producing high-grade TiO<sub>2</sub> feedstock for both sulfate or chloride slag production**

Price of TiO<sub>2</sub> Feedstock - ilmenite (USD per tonne)

Significant Supply Deficit – High Grade TiO<sub>2</sub> Feedstocks

Source: TZMI Nov 2019, Bloomberg Sep 2021

# Investment Summary

- Fastest growing, 100% unhedged and pure play uranium business listed on the NYSE American
- Production ready, low-cost In-Situ Recovery (ISR) mining with the largest resource base of fully permitted ISR projects of any U.S. based producer
- Production profile of 6.5 M lbs. U308 per year based on permitted and installed capacity of Wyoming and South Texas hub-and-spoke operations
- Physical uranium program includes 4.1 M lbs. of U.S. warehoused uranium
- Balance sheet strength with \$120 million of cash and liquid assets
- Only U.S. mined uranium can supply the Department of Energy \$1.5B Uranium Reserve - \$75M Appropriations expected in FY 2022

# Nuclear Energy

*Clean, Safe, Reliable & Economic*

Perfect Compliment to Renewable Wind and Solar

Saves Lives and Improves Quality of Life

# Nuclear Power = Carbon Free - Clean Energy

## 55% of America's Clean Energy

Life-cycle carbon emissions from selected electricity supply technologies

Source: World Nuclear Association – Harmony Program

# Nuclear Power = Safest Form of Electricity Generation

Nuclear has the lowest energy accident fatalities for OECD countries

Source: World Nuclear Association – Harmony Program

# 2021 Polar Vortex – Nuclear Reliability at 95%

## Capacity Factor by Energy Source in 2020

Source: U.S. Energy Information Administration

# Nuclear Power = Lowest Levelized Cost of Electricity For Extended Life Plants vs any Other Source

Most nuclear plants in the U.S. have or will extend their operational lives by at least 20 - 40 years

Projected Costs of Generating Electricity, 2020 Edition, International Energy Agency and Nuclear Energy Agency

# Global Approval for Nuclear Power Continues to Grow

## EU Taxonomy Draft Includes Nuclear as an Environmentally Sustainable Investment

### Nuclear energy is an EU asset

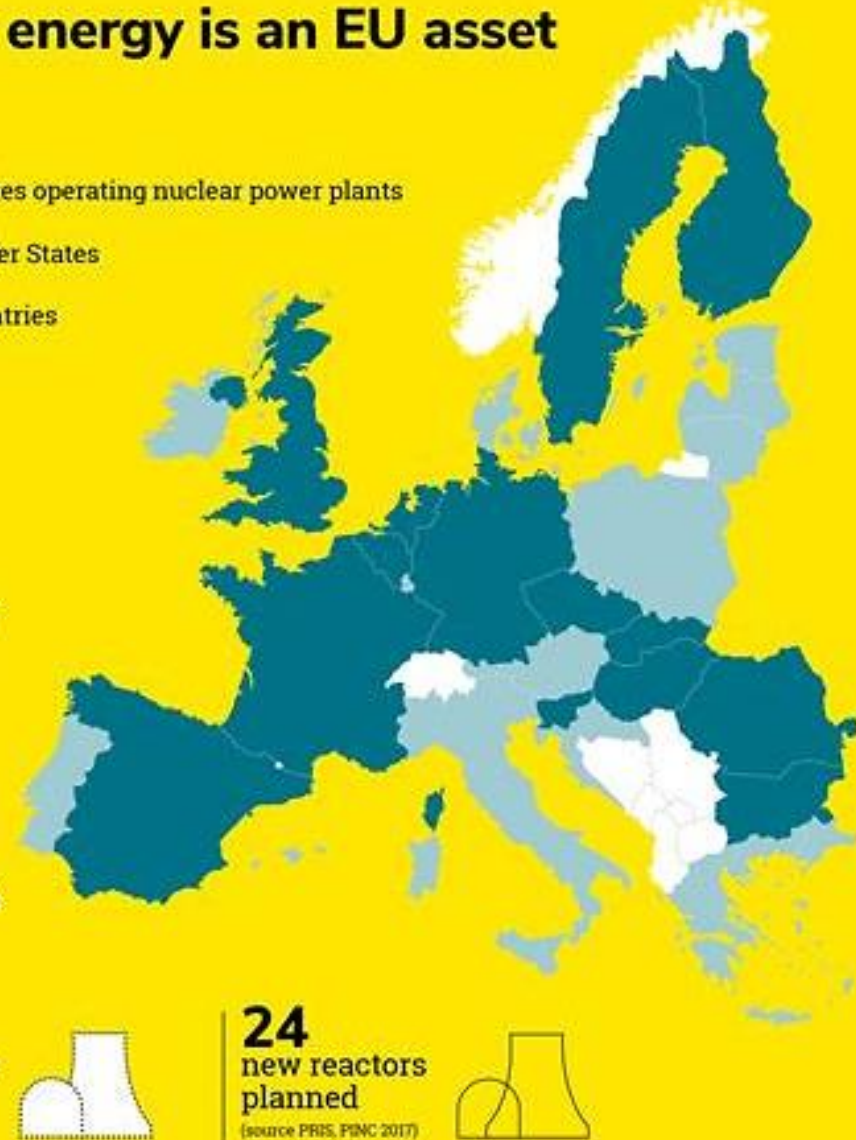

- Member States operating nuclear power plants
- Other Member States
- Non EU countries

**14**  
Member States  
operating nuclear  
power plants

**130**  
reactors  
in operation  
(2018)

**4**  
reactors under  
construction  
(source PRIS, PINC 2017)

**24**  
new reactors  
planned  
(source PRIS, PINC 2017)

# Support for Nuclear Energy is Strong and Increasing

## Favorability to Nuclear Energy 1983-2021

Overall, do you strongly favor, somewhat favor, somewhat oppose the use of nuclear energy as one of the ways to provide electricity in the United States?

Source: NuclearNewswire – ANS; Nucl earmatters.com/jobs  
<https://www.ans.org/news/article-2974/support-for-nuclear-energy-grows-with-climate-change-concerns/>

# Utility Procurement Cycle: Old Contracts Rolling Off...New Contracts Need to be Signed

1.4 Billion Pounds of Contracting needed by 2035!

### Utility Uncommitted Demand

### Historic Long-Term Contracting

Source: UxC Market Outlook Q3 2021

# Bottom Line - Positive Market Outlook

- ✓ **Demand Growth** – 60 reactors added to grid in past 8 years; 51 reactors under construction – nuclear generation has recovered to pre-Fukushima levels – More new reactors are planned
- ✓ **Strategic Interest Growing in Physical Inventory** – Producers, Developers, Financial buyers
- ✓ **The Department of Energy’s historic announcement to purchase 17-19M lbs. U.S. mined U3O8 (\$75M Appropriations expected for program start in fiscal 2022)**
- ✓ **Strong Bipartisan Support for Nuclear Energy, Included in U.S. Energy Carbon Free Goals, Clean Energy Standard, American Jobs Plan**
- ✓ **Utility Procurement Cycle Starting to Unfold** – “New” fundamentals have not been tested
- ✓ **Underinvestment and Supply Cutbacks** – significant primary supply deficit
- ✓ **Lead Time to Advance Large New Mines** can be 10 years or longer. Industry incentive price of \$60/lb.
- ✓ **Accelerated Market Re-Balancing** – Growing primary production shortfall exists. COVID removed about 20M lbs pounds from 2020 production – this will not be made up.

- a) Mineral Resources were classified in accordance with CIM Definition Standards. Cut-off grade is 0.02% eU<sub>3</sub>O<sub>8</sub> over a minimum thickness of 2 ft. Mineral Resources have not been demonstrated to be economically viable. Production by U1A has been deducted. Uranium One Q1 2019 Quarterly Report “Mineral Resource and Mineral Reserve Estimates”.
- b) Mineral Resources were classified in accordance with CIM Definition Standards. Cut-off grade is 0.02% eU<sub>3</sub>O<sub>8</sub> over a minimum thickness of 2 ft. and a GT cutoff of 0.30 ft-%. Mineral Resources have not been demonstrated to be economically viable. Independent Technical Report – “Technical Report on Resources, Moore Ranch Uranium Project, Campbell County, Wyoming USA”, WWC Engineering, April 30, 2019.
- c) Mineral Resources were classified in accordance with CIM Definition Standards. Cut-off grade is 0.02% eU<sub>3</sub>O<sub>8</sub> over a minimum thickness of 2 ft. and a GT cutoff of 0.25 ft-%. Mineral Resources have not been demonstrated to be economically viable. Independent Technical Report – “Technical Report on Resources Ludeman Uranium Project, Converse County, Wyoming, USA”, WWC Engineering, January 25, 2019.
- d) Mineral Resources were classified in accordance with CIM Definition Standards. Cut-off grade is 0.02% eU<sub>3</sub>O<sub>8</sub> over a minimum thickness of 2 ft. and a GT cutoff of 0.25 ft-%. Mineral Resources have not been demonstrated to be economically viable. Independent Technical Report – “Technical Report on Resources, Allemand-Ross Uranium Project, Converse County, Wyoming, USA”, WWC Engineering, April 30, 2019.
- e) Mineral Resources were classified in accordance with CIM Definition Standards. Cut-off grade is 0.02% eU<sub>3</sub>O<sub>8</sub> and a GT cutoff of 0.25 ft-%. Mineral Resources have not been demonstrated to be economically viable. Independent Technical Report – “Barge Uranium Project Mineral Resource NI 43-101 Technical Report, Amended and Restated, Converse County Wyoming, USA”, BRS Inc., April 16, 2019.
- f) Mineral Resources were classified in accordance with CIM Definition Standards. Cut-off grade is 0.02% eU<sub>3</sub>O<sub>8</sub> over a minimum thickness of 2 ft and a GT cutoff of 0.25 ft-%. Mineral Resources have not been demonstrated to be economically viable. Independent Technical Report – “JAB Uranium Project Mineral Resource NI 43-101 Report, Amended and Restated, Sweetwater County, Wyoming, USA”, BRS Inc., April 16, 2019.

# Uranium One Americas

<b>Location, History, Origin</b>	<ul style="list-style-type: none"> <li>▪ Located in Wyoming, U.S. strategic uranium mine region</li> <li>▪ Development of uranium properties commenced in 1970's</li> <li>▪ <b>2007</b> – U.S. assets including Wyoming properties acquired from EMC for \$1.5B</li> <li>▪ <b>2010</b> – Willow Creek and Texas operations, acquired from COGEMA for \$38M</li> <li>▪ <b>2021</b> – Acquired by UEC for \$112 million in cash, with an additional \$2.9 M in estimated working capital and the assumption of \$19 M in reclamation bonding (the “Acquisition”)</li> </ul>
